Engage your child in STEAM learning with Age-Appropriate Hands-On Science Lessons that build upon each other as weeks progress

- Everyone Keeps Their Own Lab Notebook
- Supporting Games and Activities
- All Supplies Provided
- Reinforcing Take-Home Items
- Vocabulary/Concept Cards for Parents
- Kids learn while having lots of FUN!

It's Electric - When the air is dry, why does your hair stand on end? Why do you get a zap after you slide across the carpet? Learn about different types of electricity from lighten

Don't Be Dense - How does a huge, heavy, steel ship float when a tiny, light pebble sinks? How do submarines work? Explore buoyancy and density. Make a Curious bottle diver to take home.

Science of Animation - Always want to be in the movies? Today is your day to get behind the scenes and learn how visual illusions and animations trick your eyes and brain. Make a classic animation toy to keep.

CSI Detective Science - Have you always wanted to be a crime scene investigator? Learn some of the secrets in the forensic crime lab from fingerprinting to ink chromatography.

Incredible Crystals - Discover the beautiful world of crystals. Create your own crystals in the lab and take home a slow growing crystal.

Crazy Kitchen Chemistry - What are cabbage and ketchup doing in the science lab? Find out as you participate in fun science experiments involving common kitchen ingredients. Learn about acids and bases and make your own test paper to use at home.
