

Internet of Things (IoT) Camp  
 June 7-9, 2023  
 TCS Seven Hills Park

**Beginner Friendly**

**Learn New Technologies**

**Compete in IoT Challenge**

**Free to All Participants**

**Interact with IT Professionals**

**Discover Career Opportunities**

**Collaborate in Team Activities**

goIT is a student engagement Digital Innovation program that introduces students to STEM, Computer Science, Design Thinking and Innovation.

The goIT program at TCS Seven Hills Park in Milford, OH is an experiential, immersive technology program where middle and high school students receive hands-on technology education and IT career awareness. This year's camp will allow students to work with innovative technologies to learn about the concept of Internet of Things (IoT) and how to develop prototypes to solve real-world problems. Students will get exposure to IoT technologies and how it plays a role in today's culture.

New to this year's program will be integration with the "garden in a box" Grow+ community garden initiative. Students will work alongside our IoT team to demonstrate how sensors can be used to capture and display data such as soil moisture, light, temperature, and humidity – a perfect blend of agriculture and technology.

Demystify CS

Meet Industry Experts

Provide a Safe Space to Innovate

Build Skills and Confidence

**The Need for IT**

Around the world, there are more jobs in STEM and the computer sciences than there are qualified candidates to fill them. Students often don't realize the multitude of offerings available. There's also a lack of understanding of what goes into becoming a STEM or computer science professional. At TCS, we are dedicated to interrupting this pattern.

goIT, our no-cost digital innovation and career readiness program, prepares all students with the skills, confidence and mindsets to pursue careers of tomorrow. With free tools, models and resources, students around the world work with TCS industry experts, Designing tech-based solutions to some of the world's most pressing problems all while being introduced to the vast world of opportunities in STEM and the Computer Sciences.

"goIT was an amazing experience. Not only did it give me more exposure to the technology field, but also allowed me and my fellow participants to have the unique experience of going through the process of creating a product, from the design stages to the construction, to the presentation of the product. "Not many programs for my age really allow us to go through that engineering process as they only focus on the technology itself. goIT goes beyond that and gives the participants something in which they can connect with towards the real world."

## About Tata Consultancy Services Ltd (TCS)

Tata Consultancy Services is an IT services, consulting and business solutions organization that has been partnering with many of the world's largest businesses in their transformation journeys for over 50 years. TCS offers a consulting-led, cognitive powered, integrated portfolio of business, technology and engineering services and solutions. This is delivered through its unique Location Independent Agile™ delivery model, recognized as a benchmark of excellence in software development.

A part of the Tata group, India's largest multinational business group, TCS has over 613,000 of the world's best-trained consultants in 55 countries. The company generated consolidated revenues of US \$25.7 billion in the fiscal year ended March 31, 2022, and is listed on the BSE (formerly Bombay Stock Exchange) and the NSE (National Stock Exchange) in India. TCS' proactive stance on climate change and award-winning work with communities across the world have earned it a place in leading sustainability indices such as the MSCI Global Sustainability Index and the FTSE4Good Emerging Index.
