N	Non-Leveled Class
CCP	College Credit Plus

PLANNING YOUR PROGRAM OF STUDY

The courses listed in this Course Guide will help prepare students for the future. Students should read this guide carefully and develop a high school program that will help them reach their occupational, educational and personal goals. Note: All new courses are pending Board approval. When scheduling classes for next year, students should complete the following steps:

- Review all graduation requirements
- Keep immediate and long-range goals in mind
- Select courses that fit your college and career goals

STUDENT RESPONSIBILITIES

It is the student's responsibility to be familiar with the scheduling policies and procedures contained in this Course Guide.

GRADUATION REQUIREMENTS

Beginning with the class of 2023 (students entering 9th grade after July 1, 2019) graduation requirements consist of three key components:

1. **Course Completion** - Students will satisfy curriculum requirements outlined in the "Credits for Graduation" section of this course guide.
2. **Demonstrate Competency** - Students must earn a "competency" score on the English II and Algebra I End-of-Course tests as determined by the Ohio Department of Education.

Students not earning passing scores on the first attempt must be offered appropriate remediation and support and retake the test at least once. In lieu of attaining passing

scores on the state tests, students can utilize alternative ways to demonstrate competency.

The four alternative ways to demonstrate competency are as follows:

- A. **College Credit Plus** - Earn college credit in a non-remedial math or English course (for the subject area not passed).
 - B. **Career Experience and Technical Skill** - Complete two demonstrations to show competency, at least one of which must be foundational.
 - Foundational:
 - Earn a score of proficient or higher on three or more WebXams in a single career pathway;
 - Earn an approved industry-recognized 12-point credential;
 - Complete a pre-apprenticeship in the student's chosen career field or show evidence of acceptance into an apprenticeship program (for students 18 and older) after high school.
 - Supporting:
 - Complete a 250-hour work-based learning experience with evidence of positive evaluations;
 - Earn the workforce readiness score on WorkKeys;
 - Earn the OhioMeansJobs Readiness Seal.
 - C. **Military Readiness** - Competency can be achieved by meeting the requirements to enlist in the military, as demonstrated by a contract with the military to enlist upon graduation.
 - D. **ACT/SAT Remediation-Free Score** - Competency can be achieved by students obtaining a remediation-free score in the math and English subject areas on the ACT or SAT. Please note that these scores are subject to change by the Ohio Department of Education by February 1st each year. For more information, please see [information provided by the Ohio Department of Education here](#).
 - Remediation-Free Scores for ELA
 - ACT: English subscore of 18 (or higher)
 - SAT: Evidence-Based Reading and Writing (EBRW) score of 480 (or higher)
 - Remediation-Free Scores for Math
 - ACT: Mathematics subscore of 22 (or higher)
 - SAT: Mathematics scores of 530 (or higher)
3. **Demonstrate Readiness** - Students will demonstrate readiness for their post-high school paths by earning two seals, one of which must be state defined. [Graduation Pathway Description Link](#)

- *State Defined Seals include:* Ohio Means Jobs Readiness, Seal of Bi-Literacy, Industry-Recognized Credential, College-Ready, Military Enlistment, Citizenship, Science, Honors Diploma Seal (earn one of five Honors Diplomas), Technology
- *Locally Defined Diploma Seals include:* Community service project, Fine and Performing Arts, Certified Student Engagement
- NOTE: The Graduation Pathway Description link above only lists the state minimum of 20 credits required to graduate. However, Forest Hills School District requires students to complete 22 credits to graduate (please see details below).

DIPLOMA WITH HONORS

High school students may gain state recognition for exceeding Ohio's graduation requirements through an honors diploma. Students challenge themselves by taking and succeeding at high-level coursework and in real-world experiences. Students interested in pursuing any of the honors diplomas in lieu of the Academic Honors Diploma must notify their counselor in writing of their intent prior to March 31 of their junior year.

Students have the opportunity to choose to pursue one of five honors diplomas:

1. Academic Honors Diploma
2. Career Tech Honors Diploma
3. STEM Honors Diploma
4. Arts Honors Diploma*
5. Social Science and Civic Engagement Honors Diploma

**Includes dance, drama/theatre, music and visual art.*

Click [HERE](#) for more information from ODE on Honors Diplomas.

COMMENCEMENT

Students must meet all graduation requirements established by the Forest Hills Board of Education and the state of Ohio in order to participate in Commencement. Students who do not meet these requirements, regardless of the reason, **will not** be permitted to participate in the Commencement program held at the end of the school year.

School personnel work throughout the school year with students who might not graduate on time because of credit deficiencies. Parents or guardians are also contacted at regular intervals if the chance exists that their child will not graduate on time. **However, it remains**

the primary responsibility of the student to make sure all graduation requirements are met and to notify his/her parents or guardians if an academic problem exists which may impede commencement participation.

Seniors who withdraw from school during the second semester of their senior year and finish their graduation requirements through correspondence or night school are not eligible to participate in the Commencement ceremony.

EARLY GRADUATION

Students who are interested in graduating in fewer than the typical four years of regular school attendance shall file a written request with the principal. If a student desires to graduate at the end of the first semester of their senior year, the principal should receive a written request before the end of the second semester of the student's junior year. Students who wish to graduate in three years should make a written request no later than the end of their sophomore year. The principal reserves the right to waive these deadlines if circumstances warrant.

A student who graduates early will receive his/her diploma after commencement. A copy of the complete board policy about graduation and commencement is available on the Forest Hills School District webpage under Board Docs or click [HERE](#).

THE PHYSICAL EDUCATION GRADUATION REQUIREMENT WAIVER

(based upon [Section 3313.603 of the Ohio Revised Code, Letter L](#))

Students in the Forest Hills School District in grades 9-12 who successfully complete (as determined by sponsor coach, Athletic Director) two full seasons of interscholastic athletics, marching band, or cheerleading may be excused from the high school physical education graduation requirement. The "two full seasons" requirement may be completed within a single school year.

According to Ohio Revised Code, boards of education may NOT provide for partial completion of the high school physical education requirement; therefore, the one-half unit requirement cannot be partially exempted.

For example, it is not possible to combine one semester of a physical education course with successful completion of one athletic, marching band, or cheerleading season to meet the physical education graduation requirement.

Impact on Overall Graduation Requirements - PE waiver is not earned credit; 22 credit minimum still applies. PE waivers are available in the counseling office.

Successful Completion of a Season - Successful completion of a season, in the case of interscholastic athletics, means that a student is both a member of the team or group and is eligible for end of season awards/recognition.

Formal starting dates for interscholastic athletics are determined by the OHSAA. Starting dates for marching band and cheerleading will be determined by the respective advisors; the starting date may be inclusive of mandatory camps.

Recognized Activities

In addition to cheerleading and marching band, interscholastic athletic teams currently recognized by the Ohio High School Athletic Association in Forest Hills Schools include:

Baseball	Basketball	Bowling	Cheerleading	Cross Country
Dance	Diving	Football	Golf	Gymnastics
Lacrosse	Softball	Soccer	Swimming	Track
Volleyball	Wrestling	Tennis		

Students wishing to apply for the physical education should access the waiver through the counselor's office.

CREDITS FOR GRADUATION

The following chart displays the required earned credits for graduation from a Forest Hills high school, per Forest Hills Board of Education policy 5460.

Subject	Credits
English Language Arts *Must be in English I, II, III, and IV	4.0
Mathematics *3 of the 4 credits must be earned in grades 9-12, with Algebra II required *Computer Science courses may be used as a 4th math class. Consult your counselor.	4.0
Science *Inquiry-based with lab experience *Must include one (1) unit of Physical Science or Chemistry AND one (1) unit of Biological Science or one (1) unit of a Science Elective *Computer Science courses may be used as an advanced science class. Consult your counselor.	3.0
Social Studies *1 unit of Modern World History, Honors Modern World History or AP Human Geography *1 unit of U.S. History or AP U.S. History *0.5 unit of American Government or AP U.S. Government and Politics *1.0 unit of Social Studies Elective	3.5
Health	0.5
Physical Education *Must include 0.25 unit of Introduction to Physical Education (see PE Waiver information)	0.5
Electives *All students must receive instruction in economics and financial literacy during grades 9-12 and must complete at least two semesters of fine arts taken any time in grades 7-12. Students following a career-technical pathway (e.g. attending a Great Oaks campus) are exempt from the fine arts requirement. <i>*For the Class of 2024 and 2025, The Ohio Core Requirement for Financial Literacy may be earned through successful completion of any one of the following courses: Career and Life Planning, Personal Finance, Introduction to Business, College and Career Readiness: Charting Your Course for the Future or AP Macroeconomics.</i> NOTE: Beginning with the Class of 2026, a student's Financial Literacy credit must be completed as a "stand alone" course. Personal Finance is the only course that satisfies this requirement. *Remaining elective units may include any combination of remaining courses.	6.5
TOTAL	22.0

Forest Hills
School District

ENGAGE • EMPOWER • EXCEL

Policies and Procedures

GRADE LEVEL PLACEMENT

For the 2023-2024 School Year, the following chart can be used to determine grade level

Grade Level	Graduating Year
Grade 9	2027
Grade 10	2026
Grade 11	2025
Grade 12	2024

COLLEGE PREPARATORY COURSE OF STUDY

Students who plan on attending a four-year college or university are recommended to complete at a minimum: one advanced math course, two consecutive years of World Language, one elective in the Fine Arts, and at least one Advanced Placement (AP) or College Credit Plus (CCP) course during high school.

LEVELS IN ACADEMIC CLASSES

A number of academic classes are leveled in the Forest Hills School District. We strive to place students with similar achievement, interest and ability in the same class. Students and parents who disagree with the recommended course may request a waiver.

Advanced Placement (AP): Advanced level courses are taught on the college level. Students in AP classes will be expected to take the Advanced Placement Examination in May.

College Credit Plus (CCP): College Credit Plus courses are taught on the college level. Students have the opportunity to earn college credit for their work in these courses.

Honors (H): Honors courses are taught at an accelerated rate.

College Preparatory (CP): College preparatory level courses are designed for the student wishing to acquire a strong background for college entrance.

GRADE POINT AVERAGE

Forest Hills utilizes a 4.0 grade point average (GPA) calculation. Semester grades in all courses earning letter grades are used to determine a student's cumulative GPA. Weighted GPA is calculated with an additional 1.0 for AP/CCP courses (for a potential 5.0) and an additional 0.5 for Honors/Pre-AP courses (for a potential 4.5). Cumulative GPA is factored at the end of each semester. Please refer to the tables below for specific calculations. Quarter GPA is not weighted and is used only to determine athletic eligibility, honor roll and Anderson Achievers (AHS only).

Unweighted GPA			Weighted GPA			
Grademarks			Grademarks	Honors	AP/CCP	
A+	97-100%	4.0	A+	97-100%	4.5	5.0
A	93-96%	4.0	A	93-96%	4.5	5.0
A-	90-92%	3.7	A-	90-92%	4.2	4.7
B+	87-89%	3.3	B+	87-89%	3.8	4.3
B	83-86%	3.0	B	83-86%	3.5	4.0
B-	80-82%	2.7	B-	80-82%	3.2	3.7
C+	77-79%	2.3	C+	77-79%	2.8	3.3
C	73-76%	2.0	C	73-76%	2.5	3.0
C-	70-72%	1.7	C-	70-72%	2.2	2.7
D+	67-69%	1.3	D+	67-69%	1.3	1.3
D	65-66%	1.0	D	65-66%	1.0	1.0
F	0-64%	0.0	F	0-64%	0.0	0.0

The grades of students who are new to the Forest Hills School District will be converted to this system. Individual circumstances may vary. See the school counselor or an administrator with questions.

Note: College Credit Plus courses are weighted according to the highest weight offered in the corresponding FHSD content department as required by the State of Ohio. See [ORC 3333-1-65.2 \(B\)\(7\)](#) and Forest Hills Board Administrative Guideline AG2271 for more details.

EDUCATIONAL OPTIONS:

Students may earn credits through Advanced Placement, College Credit Plus, and Credit Flexibility as defined below:

A. ADVANCED PLACEMENT (AP)

Advanced Placement (AP) courses are college-level courses offered to high school students. These courses, which are offered through the College Board, give students the opportunity to earn college credit and/or qualify for more advanced courses when they begin college. To earn college credit for an AP class, students must take and pass the corresponding Advanced Placement test. These tests are scored on a range of 1-5, with 5 being the highest possible score. A score of 3 is considered passing.

[AP Credit Policies at Colleges and Universities](#)

Note: Students interested in taking more than four AP courses in a single semester should meet with a counselor and administrator to ensure a rigorous schedule with more than four AP courses is in the best interest of the student.

B. COLLEGE CREDIT PLUS (CCP)

College Credit Plus (CCP) is the name for Ohio's dual enrollment program which allows students to take available courses for transcript credit for both high school and college. There is no financial obligation for the student to participate in CCP when the student is enrolled in a public college or university and successfully completes the course.

Each year, students must meet with a counselor and/or attend an informational meeting (taking place in the early Spring), complete an Intent to Participate form, and submit this form to the school counselor no later than the last school day of March in order to be considered for eligibility for the following school year. **The form must be completed by students with any interest in the CCP courses.** Interested students and parents should contact a school counselor for additional information.

Important Notes:

- **Students cannot take more than the equivalent to 30 college credit (semester) hours in a given school year. For calculation purposes, a full year of a high school course is considered 3 college credit hours.**
- **Including CCP courses taken in middle school, a student may not exceed 120 college credit (semester) hours throughout the middle school and high school career.**

- If a student exceeds the 30 or 120 college credit (semester) hours, that student will be responsible for the cost of any additional courses above the minimum allowed.

The following table is a **sample** credit bearing pathway provided to FHSD from the University of Cincinnati. These courses may be offered at any of the UC campuses including Main, Clermont, and Blue Ash.

Liberal Arts (BA) 15 Credit Hour Pathway		
Course	Title	Credit
BIOL1081	Biology I	3
BIOL1081L	Biology I Lab	1
ECON1001	Intro to Microeconomics	3
ENGL1001	English Composition	3
HIST1001	U.S. History I	3
MATH1026	Pre-Calculus	5
Total Credit Hours		18

Liberal Arts (BA) 30 Credit Hour Pathway		
Course	Title	Credit
BIOL1081	Biology I	3
BIOL1081L	Biology I Lab	1
ECON1001	Intro to Microeconomics	3
ENGL1001	English Composition	3
HIST1001	U.S. History I	3
MATH1026	Pre-Calculus	5
POL1010	Intro to American Politics	3
SPAN2015	Spanish Comp and Conv I	3
SPAN2016	Spanish Comp and Conv II	3
Total Credit Hours		25

C. CREDIT FLEXIBILITY

Students may also earn credit by pursuing the educational options in accordance with the Forest Hills School District Credit Flexibility Program. Please see your counselor for more information.

D. GREAT OAKS CAREER AND TECHNICAL SCHOOLS

High school students residing in participating school districts may attend any Great Oaks campus and earn certification in a career field. Students attending Great Oaks receive a high school diploma from their home school when they complete their graduation requirements. They may also participate in their high school's commencement exercises. Students attending Great Oaks may participate in home school extra-curricular activities if scheduling and transportation can be arranged. Attendance at Great Oaks is free for high school students.

Information on each of the Great Oaks career programs can be found in the Career Pathway sections on page 22. Additional information about Great Oaks can be found at these links:

[Great Oaks High School Career Programs](#)

E. COMMUNITY PARTNERSHIPS

Community Partnerships are internship, shadowing, and workshop opportunities offered through collaborations between the Forest Hills School District and community businesses and organizations.

Students are encouraged to explore opportunities by visiting the "Community Partnership" folder on their class schoology page (Turpin), or the Anderson In The Know schoology page (Anderson). There, students can discover dozens of opportunities to engage in a Community Partnership that aligns with their interests. Students interested in a Community Partnership can contact their counselor or the district's Community Partnership Specialist.

HIGH SCHOOL CREDITS FOR COURSES TAKEN IN EIGHTH GRADE

All students who successfully complete a World Language course, Algebra I or Geometry during their eighth grade year will receive one graded unit of high school credit in each course. The grade and the unit of credit will be included on the high school transcript, and will be averaged into the grade point average.

Transfer students must provide verification that these courses were taken for high school credit and credit was given in the seventh or eighth grade at the original school.

SCHEDULE CHANGES

Selecting classes for the next school year is an important decision. Because schedule changes can have a significant effect on class size, availability of staff and the number of textbooks, students should plan carefully, realizing course requests will not be changed after the deadline.

After May 1, the teacher, counselor, parent and administrator will discuss and determine whether the student has been placed in the wrong course.

Schedule changes will NOT be made based on preference for a teacher.

Below are examples of reasons a schedule may be altered:

- The school has made a scheduling error
- A class needed to meet graduation requirements is not scheduled
- A prerequisite has not been completed successfully
- Student previously failed a subject with the same teacher (if space allows the change)
- Student wants to replace a study hall with an academic class (class must be added before the 10th day of the semester)

*In addition, after **ten days following the start of the course**, all classes approved by the principal to be dropped will receive a **WF** (withdraw/failing) grade on the student's transcript. Should a student or parent wish to drop a course or change levels, that student/parent should reach out to the counselor for more information.*

CHEATING OR PLAGIARIZING

Because student learning is the primary objective of the Forest Hills School District, the faculty and district administration regard academic dishonesty, cheating or plagiarism as serious breaches of ethical academic behavior. For more information regarding school rules and policies, consult the student handbook or contact the administrative offices at either high school.

FAILURE TO COMPLETE COURSE REQUESTS

Courses for students who fail to enter their course requests online will be scheduled by the student's counselor. These selections are considered final unless the student requests a change prior to May 1.

REPEATING A FAILED SUBJECT

When a student repeats a subject previously failed, the grade earned upon repeating the class will become a part of the student's record as well as the original "F". Both grades will become part of the student's GPA.

CREDIT RECOVERY

Students who fail a course required for graduation will have several options for make-up credit including, but not limited to, the following:

- Enroll in the Forest Hills School District summer school program
- Retake the course during the regular school year
- Enlist an outside provider for an online, correspondence, or classroom course

IMPORTANT NOTES/CONSIDERATIONS:

- Outside provider courses must be approved by the building administration. Credit may not be accepted unless this is done. Students are not permitted to make up a course while currently taking the same course.
- Expenses for summer school or an outside provider will be the responsibility of the student.
- Seniors utilizing an outside provider must have completed the course(s) and submitted an official transcript to the school counselor by May 15 of their senior year in order to participate in the graduation ceremony.
- Online courses will require students to demonstrate mastery of the essential learning necessary for each course. In addition to earning a passing grade in the course, demonstrating mastery may also include extended writing assignments, exams, presentations, and/or other evidence of learning.

ATHLETIC ELIGIBILITY

In order to be eligible to participate in athletics in grades 9-12, students must fulfill the following requirements:

- Have been enrolled in a high school or middle school during the immediately preceding grading period;
- During the preceding grading period, have earned passing grades in a minimum of five 1.0 credit courses or the equivalent which count toward graduation. Physical education is only a 0.25 credit course, so it does not count enough towards the 5 credit requirement;
- Have obtained a 1.7 GPA or higher during the preceding grading period.

The eligibility of a student continues until the start of the 5th school day of the next grading period, at which time the grades from the immediately preceding grading period become effective. The ineligibility of a student continues until 24 hours after the official grade posting date of the Forest Hills School District.

FALL SPORTS ELIGIBILITY:

Eligibility to participate in fall sports is determined by grades earned in the 4th quarter grading period of the preceding school year. Students must have maintained a 1.7 GPA. Students enrolled in grade 9 during the first grading period (after advancement from 8th grade) must have passed a minimum of four (4) classes carried from the preceding grading period.

COURSE FEES

Courses that have included fees from the previous academic year state that fees apply. Additional fees may be assessed by the Board of Education. Students enrolled in Advanced Placement courses will have the College Board exam fee added to their fee totals. An opt out procedure will be communicated in the fall, subject to timelines required by the College Board. Parents and guardians will be notified when fees are due.

AUDITING A COURSE

Students who have previously passed a course may audit the course again (*take the course again*) for remediation. An audited course cannot be taken for additional credit. Both grades will appear on a student's transcript, but only the student's original grade will be included in the student's GPA, and if the following conditions are met:

1. The student has the permission of the parents/guardians, teacher and counselor.
2. Class size permits the enrollment.
3. The student completes all assignments and behaves well.

COLLEGE ADMISSIONS

Because colleges vary widely in their entrance requirements, students should refer to college catalogs, websites and their counselor for additional information. Students should do this early in their school career, especially if interested in a selective or private college.

Seniors should select a challenging grade 12 program, and students interested in a selective college should follow recommendations listed in the College Handbook which is available in the counseling office.

CLASS SIZE AND COURSE AVAILABILITY

Class size and staff availability have an impact on whether a course will be offered. School counselors and administration will make every effort to apprise students of any expected limitations on course availability. Classes in which enrollment is expected to be small may not be offered or may be offered at only one of the two high schools. Be sure to contact your school counselor with any questions regarding your course requests for the 2023-2024 school year.

STUDENT PATHWAYS

CAREER PATHWAYS:

The Forest Hills School District is committed to assisting students in developing a high school experience that matches their individual interests, skills and knowledge, while preparing them for the next steps on their journey to future-readiness. Students engage in a comprehensive curriculum through opportunities in Xello, a K-12 career planning platform. High school students also have access to career opportunities through FHSD

Experienceships, partnerships with Great Oaks programming offered at AHS and THS (Business Management, Marketing, and Teacher Academy), attendance at Great Oaks Career and Technical campuses, and student-created opportunities through FHSD Credit Flex.

Career pathways help students to personalize their educational plan and reach goals that extend beyond high school. A career path indicates a broad spectrum of careers that have similar characteristics and requirements for employment. The U.S. Department of Education has identified 16 career clusters designed to help students focus on career aspirations. The district's career pathways take those 16 and combine them into four broad and flexible paths for academic instruction and student exploration. These are:

Health and Social Services

STEM (Science, Technology, Engineering and Math)

Arts, Humanities and Communication

Business, Finance and Law

GOALS OF CAREER PATHWAYS:

The Ohio Department of Education provides details for a Career Pathway. [Click here for more information](#). Overall, the goals of the Career Pathway are:

1. To assist each student in determining high school courses based on interest and ability.
2. To provide a variety of course offerings that will prepare students for education/training beyond high school to meet individual career goals.
3. To produce students who excel in the following seven areas established as part of the district's vision for student learning:
 - Critical Thinking and Problem-Solving
 - Collaboration and Leadership
 - Agility and Adaptability
 - Initiative and Entrepreneurialism
 - Reading, Oral and Written Communication
 - Accessing and Analyzing Information
 - Curiosity and Imagination

Career Pathways are not intended to lock students into a career or a prescribed set of high school courses. However, they can serve as a guide when students are selecting courses working with counselors to develop a post-high school plan. Students should begin reviewing these pathways during their 8th grade year when selecting their 9th grade courses and should continue to use this guide as a resource when making scheduling choices during their high school career.

DESCRIPTION OF PATHWAYS:

These descriptions offer students an opportunity to reflect on possible career pathways of interest. Students may have career interests that extend beyond the descriptions provided. The information below is not intended to be a thorough representation of career options but a general overview and exposure to generalized career areas

HEALTH AND SOCIAL SERVICES

The Health and Social Services pathway includes a large and diverse group of careers that promote education, health, diagnosis, treatment and wellness. Careers in this pathway have the potential to improve and save lives.

Sample Careers Include: Education, counseling, mental health services, consumer services, personal care services, therapeutic services, diagnostic services, disease treatment services, public safety and protective services, fire protection services, health informatics and biotechnology research and development.

Great Oaks Programs

- Health Sciences:
 - Dental Assisting (*Laurel, Scarlet*)
 - Exercise Science & Sports Medicine (*Diamond, Laurel, Live, Scarlet*)
 - Health Technology (*Diamond, Laurel, Live, Scarlet*)
 - Secondary Practical Nursing (*Scarlet*)
 - Surgical Technology (*Diamond, Scarlet*)
 - Vision Care Technology (*Diamond*)
- Human Services & Education:
 - Cosmetology (*Diamond, Laurel, Live, Scarlet*)
 - Culinary (*Diamond, Live, Scarlet*)
 - Early Childhood Education (*Laurel, Live, Scarlet*)
 - Teacher Professions (AHS, THS)

SCIENCE, TECHNOLOGY, ENGINEERING AND MATH (STEM)

Careers in STEM are exciting, challenging and ever-changing. STEM careers may involve designing, inventing, or building a wide variety of commodities. Learners who pursue one of these career fields may be involved in planning, managing and providing scientific research or professional and technical services including laboratory, research and development services.

Sample Careers Include: Scientific research and development, fuel cell technology and robotics, agricultural services, food processing, horticulture, natural resource management, environmental services production planning and control, electrical engineering, maintenance engineering, manufacturing engineering, industrial engineering, transportation services, process engineering, information support services, communication network services, programming and software development/applications and interactive multimedia development.

Great Oaks Programs

- Engineering, Manufacturing & Technology:
 - Engineering Technologies & Robotics (*Scarlet*)
 - CNC Advanced Manufacturing Technologies (*Diamond, Live*)
 - Welding (*Diamond, Laurel, Live, Scarlet*)
- Natural Resources & Agriculture:
 - Animal Science & Management (*Laurel, Live*)
 - Equine Science & Management (*Diamond, Laurel*)
 - Veterinary Assisting (*Diamond, Live, Scarlet*)
- Skilled Trades:
 - Commercial & Residential Electricity (*Diamond, Scarlet*)
 - Construction Framing & Finishing (*Diamond, Scarlet*)
 - Construction Technologies (*Laurel*)
 - Heating, Ventilating & Air Conditioning (*Diamond, Laurel, Live*)
 - Heavy Equipment Operations (*Laurel, Live*)
- Transportation Logistics:
 - Automotive Refinishing & Collision Repair (*Diamond, Laurel, Live, Scarlet*)
 - Automotive Service Technician (*Diamond, Laurel, Live, Scarlet*)
 - Aviation Maintenance Technician (*Diamond, Laurel*)
 - Industrial Diesel Mechanics (*Laurel, Scarlet*)

ARTS, HUMANITIES AND COMMUNICATION

Careers in Arts, Humanities and Communications tap into creative and expressive talents. This career pathway requires the ability to communicate effectively in both oral and written form and strong reading skills. In many ways, this pathway is about storytelling in various forms, capturing the human experience and reflecting it back to various audiences, helping others reflect upon the world around them and inspiring others to make a difference.

Sample Careers Include: Performing arts, visual arts, theatre arts, literary arts, media arts, education, journalism, television and radio broadcasting.

Great Oaks Programs

- Arts, Communications & Info Systems:
 - IT Academy (*Laurel, Live*)
 - Digital Arts & Design (*Diamond, Laurel, Live, Scarlet*)
 - Web Applications & Game Development (*Diamond, Scarlet*)

BUSINESS, FINANCE AND LAW

The Business, Finance and Law pathway includes careers in planning, organizing, directing and evaluating functions essential to efficient and productive organizational operations, helping people and companies reach goals and achieve dreams. Learners with an interest in the Business, Finance and Law pathway should develop a variety of skills including but not limited to strong interpersonal, presentational and leadership skills.

Sample Careers Include: Business management, administrative support, human resources, business administration, hospitality and tourism, marketing, information management, product/service management, financial advising, financial and investment planning, accounting, banking, insurance, real estate, financial planning, sales, public administration, public safety and protective services, homeland security, public planning, emergency management planning, fire protection, foreign services and criminal justice system services.

Great Oaks Programs

- Law & Public Safety:
 - Firefighting/Emergency Medical Service (*Scarlet*)
 - Law Enforcement (Scarlet)
- Business:
 - Marketing Management & Research (AHS)

4 YEAR COURSE PLANNING CHART

When planning, make sure you've added up the credits in the rightmost column.

Also include the required courses below the chart.

	9th grade	10th grade	11th grade	12th grade	Total Credits
English	English 9	English 10	English 11	English 12	_____ (4 needed)
Math					_____ (4 needed)
Science (some classes are 0.5 credit, some are 1 credit)	Biology	Physical Science or Chemistry			_____ (3 needed)
Social Studies (some classes are 0.5 credit, some are 1 credit)	World History or AP Human Geography	US History	Government <u>and</u> _____		_____ (3.5 needed)
World Language					_____
Electives (classes are .25, .5, or 1.0 credit)	- - - -	- - - -	- - - -	- - - -	_____
Grand Total:					_____ (22 needed)

Electives required for graduation

- Health
- 2 Physical Education courses
- Financial Literacy (several options in course guide)
- Visual or Performing Arts (anytime in grade 7-12)

Colleges/universities want to see

- At least 2 years of World Language (3 for selective colleges)
- Visual or Performing Arts
- Chemistry and Physics

FINANCIAL LITERACY

Grade Level: 10, 11, 12

Course Credit: 0.5 credit, one semester

Description:

This semester-long course is designed to help students discover new ways to maximize their earning potential, develop strategies for managing their resources, explore skills for the wise use of credit, and gain insight into the different ways of investing money. Students will explore topics such as financial responsibility, decision making, money management, risk management, and being an informed consumer.

This course fulfills the financial literacy graduation requirement for all graduating classes.

Fee: This course requires a student fee.

FINANCIAL LITERACY (ONLINE)

Grade Level: 10, 11, 12

Course Credit: 0.5 credit, one semester

Description:

This is a fully online course. Students will have regular opportunities to meet with the teacher for assistance and progress checks. Regular due dates for work completion will be set by the teacher that coincide with the regular grading periods. Students in this online course will experience the same content as the face-to-face course but with the added flexibility of individualized learning. This semester-long course is designed to help students discover new ways to maximize their earning potential, develop strategies for managing their resources, explore skills for the wise use of credit, and gain insight into the different ways of investing money.

This course fulfills the financial literacy graduation requirement for all graduating classes.

Fee: This course requires a student fee.

INTRODUCTION TO BUSINESS

Grade Level: 9, 10, 11, 12

Course Credit: 0.5 credit, one semester

Description:

Introduction to Business is a one semester course that introduces students to the career fields of Business & Administrative Services, Finance and Marketing. Students will learn skills in fundamental business activities. They will acquire knowledge of business processes, economics and business relationships. Students will use technology to apply and share business information. Employability skills, leadership, communications and personal financial literacy will be addressed.

This course fulfills the financial literacy graduation requirement for the Classes of 2023, 2024, and 2025. It does *not* fulfill the financial literacy requirement for the Class of 2026 and beyond.

ENTREPRENEURSHIP

Grade Level: 10, 11, 12
Course Credit: 0.5 credit, one semester

Description:

Entrepreneurship is a class designed to allow students to explore the exciting world of starting and owning a business. Students will discover real world business fundamentals covering economics, marketing, management, ownership and distribution. The pitfalls and rewards of being an entrepreneur will also be explored.

BUSINESS MANAGEMENT I

Grade Level: 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Students must apply and interview with the teacher prior to admission

Description:

Business skill development will include communication skills, basic understanding of the accounting cycle and basic economics. Topics in Business Management practices will be introduced. Students will explore process and project management and its importance in managing resources, quality and information, 21st Century soft skills, ethics and accounting. Students will participate in the Future Business Leaders of America organization. Students will close the year with a career seminar to prepare for the internship portion of Business Management II in their senior year.

Fee: This course requires a student fee.

BUSINESS MANAGEMENT II

Grade Level: 12
Course Credit: 2 credits, two semesters
Prerequisite: Two semesters of business courses and teacher recommendation

Description:

Business skill development will continue in the senior year for students who completed basic economics topics in Business Management I as juniors. Topics covered in the Business Management I class will be continued at a more advanced level. Students will be exposed to management functions and decision making, technology and information management, financial analysis of a business, financial services, credit and human

resources management. Students will also be working in internship positions 8-10 hours per week to reinforce the skills and knowledge they have acquired in the classroom. Students will work in a variety of business fields such as finance, management, information management, planning, promotion, pricing and purchasing. Students will participate in the Future Business Leaders of America organization.

The student has the option of early dismissal if all graduation requirements are met. Students in this course will also be prepared to take the College Board CLEP exam for college credit in Business Management.

Fee: This course requires a student fee

Additional Information: Marketing Management and Research Program

The Marketing Management and Research Program is designed to provide a solid foundation of business, finance and marketing knowledge for those students interested in majoring in college or pursuing a career in these fields. It will begin with Introduction to Business and Marketing Principles semester courses in either the student's freshman or sophomore years. Marketing I will build on knowledge learned in these courses and provide greater focus developing marketing skills. Marketing II will provide students the opportunity to apply previous knowledge learned and further fine skills through various independent and team project management activities within the school and around the community. This course includes a Marketing Internship which offers students the opportunity to extend classroom learning through a variety of business and marketing-related internships.

DECA is a valuable component to the Marketing Management and Research Program. Students in this program will reinforce classroom skills through participation in business and marketing competitions, conferences, leadership challenges and opportunities. Students who are actively involved in DECA become eligible for many scholarships through participation and internship-related opportunities.

Completion of this program provides students the opportunity to earn 3-6 college credits upon successful completion of the senior course and/or Marketing CLEP exam.

This semester-long course is designed to help students discover new ways to maximize their earning potential, develop strategies for managing their resources, explore skills for the wise use of credit, and gain insight into the different ways of investing money. Students will explore topics such as financial responsibility, decision making, money management, risk management, and being an informed consumer.

MARKETING I-MARKETING, MANAGEMENT AND RESEARCH

Grade Level: 11,12

Course Credit: 1 credit, two semesters

Prerequisite: Students must apply and interview with teacher prior to admission

Description:

Marketing I is designed to develop skills in the area of promotional strategy, advertising, sales promotion and publicity/public relations. Applying project management techniques, students will guide and control promotional campaign development and execution. Students will also learn motivation theories, branding techniques and design principles in communications with targeted audiences to influence. Students will create, execute and evaluate promotional strategies and content for advertising, sales promotion and publicity/public relations. Technology, employability skills, leadership and communications will be incorporated in classroom activities. Students may participate in DECA, a student organization, which provides self-growth and leadership opportunities through competitive events, leadership development and conferences at the local, state and national levels. This course will be held at Anderson High School. Turpin High School students have the opportunity to take this course at AHS.

Fee: This course requires a student fee.

MARKETING PRINCIPLES

Grade Level: 9-12

Course Credit: 0.5 credit, one semester

Description:

The second course in Marketing Management & Research series, this one semester course introduces students to the specializations offered in Marketing. Students will obtain fundamental knowledge and skills in marketing communications, marketing management, marketing research, merchandising and professional selling. They will acquire knowledge of marketing research, merchandising and professional selling. They will acquire knowledge of marketing strategies, market identification techniques, employability skills, business ethics and law, economic principles and international business. Technology, leadership and communications will be incorporated in classroom activities. Students are eligible to participate in DECA, a student organization that provides self-growth and leadership opportunities through competitive events, leadership development and conferences at the local, state and national levels.

This course will be held at Anderson High School

MARKETING II-MARKETING, MANAGEMENT AND ENTREPRENEURSHIP

Grade Level: 12

Course Credit: 2 credits, two semesters

Prerequisite: Successful completion of Marketing I and teacher recommendation

Description:

A continuation of Marketing I, students will apply management and motivation theories to plan, organize and direct staff utilizing project-based learning. They will learn to manage a workforce, lead change and build relationships with employees and customers. Students will use technology to analyze the internal and external business environment, determine trends impacting business and examine risks threatening organizational success. Ethical challenges, project management and strategic planning will also be addressed. All students will participate in DECA, a student organization, which provides self-growth and leadership opportunities through competitive events, leadership development and conferences at the local, state and national levels.

Students have the option of early dismissal if all graduation requirements are met. Students are eligible to earn 3-6 college credits through completion of the Marketing CLEP exam and/or C-Tag college credit at the end of their senior year. Exam paid for in conjunction with Great Oaks.*This course will be held at Anderson High School.

Fee: This course requires a student fee.

College & Career Readiness

COLLEGE AND CAREER READINESS

Code	Course	Level	Grade	Semesters	Credit	Career Pathways
6523	College and Career Readiness: Charting Your Course for the Future		10-12	1	0.5	

COLLEGE AND CAREER READINESS: CHARTING YOUR COURSE FOR THE FUTURE

Grade Level: 10, 11, 12

Course Credit: 0.5 credit, one semester

Description:

This course will equip students with the necessary information and skills to successfully prepare for the ACT, PSAT and SAT. Additionally, students will explore college and career options, learn interview techniques and financial planning. Students will explore their personal academic, career and life goals, and chart a path to successfully reach them.

This course fulfills the financial literacy graduation requirement for the Classes of 2023, 2024, and 2025. It does *not* fulfill the financial literacy requirement for the Class of 2026 and beyond.

Computer Science and Engineering

COMPUTER SCIENCE AND ENGINEERING

Code	Course	Level	Grade	Semesters	Credit	Career Pathways

8720	Advanced Studies in Computer Science	CP	12	2	1.0	

*Denotes Honors-level GPA boost

**Denotes AP-level GPA boost

NOTE: AP Computer Science A and AP Computer Science Principles do qualify as an option for the 4th math credit, beyond Algebra 2

APPLIED COMPUTER SKILLS

Grade Level: 9, 10, 11, 12

Course Credit: 0.5 credit, one semester

Description:

This course is designed for the student who wants more expertise in using application software for both academic and future-ready pursuits. Students will master a variety of important applications and create personal projects in a collection of current software programs including business software (spreadsheets, forms and presentations), web design coding (CCS, Java scripts and HTML5) and digital multimedia (pictures, music and movies). This is the kind of software most likely needed in college, the business world and social media.

PROGRAMMING

Grade Level: 9, 10, 11, 12

Course Credit: 0.5 credit, one semester

Prerequisite: Algebra I (CP or H)

Description:

This semester-long course is an introduction to computer programming (“coding”) and is open to all students who have completed Algebra 1. It covers the fundamental ideas of programming including screen design, user interfaces, decision branching, repetition, subroutines and establishing good overall coding habits. Emphasis will be on creating fun and interesting applications and the basics of game design. This course meets the requirement for the fourth math credit beyond Algebra II.

AP COMPUTER SCIENCE PRINCIPLES**

Grade Level: 10, 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Algebra I and CP English

Description: Computer science experience has become imperative for today’s students and the workforce of tomorrow. AP Computer Science Principles introduces students to the fundamentals of computing, including problem solving, working with data, understanding the Internet, cyber security, and programming/coding. Students will learn the computational and thinking skills needed to create digital projects—from simple games and apps to programs that can analyze large data sets or inspire the creation of visual art and music. With a focus on writing/coding computer programs to solve problems and real-world applications, this course prepares students for college and a variety of careers such as 3-D animation, engineering, music, app development, medicine, visual design, robotics, or political analysis. Students will also have an opportunity to:

- Use computer science to address real-world issues that interest them
- Create/write/code computer programs that have practical impact
- Gain skills relevant across other disciplines and industries

This course is part of a national project through the College Board and National Science Foundation. This course meets the requirement for the fourth math credit beyond Algebra II.

Fee: This course requires an AP Exam fee.

AP COMPUTER SCIENCE A**

Grade Level: 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Programming or AP CS Principles and teacher recommendation

Description:

AP Computer Science A introduces students to computer science through programming, or coding, using the Java language. Fundamental topics in this course include the design of solutions to problems, the use of data structures to organize large sets of data, the development and implementation of algorithms to process data and discover new information, the analysis of potential solutions, and the ethical and social implications of computing systems. The course emphasizes object-oriented programming and design. This course meets the requirement for the fourth math credit beyond Algebra II.

Fee: This course requires a student fee + AP Exam fee.

ADVANCED STUDIES IN COMPUTER SCIENCE

Grade Level: 12

Course Credit: 1 credit, two semesters

Prerequisite: AP Computer Science A and teacher recommendation

Description:

This course will be tailored to meet the needs of the students. If there is enough interest, a traditional teacher-led course could be offered. If not, an Independent Study program would be set up. The student would have to be self-motivated and would be responsible for the development of the tasks and assessments. Topics might include robotics, virtual worlds, internet programming, Java GUI applets, gaming, advanced data structures, etc. Students could even suggest a topic they want to study. This course meets the requirement for the fourth math credit beyond Algebra II.

1630	Advanced Journalism: Yearbook		10-12	2	1.0	
1711	Media Literacy		11-12	1	0.5	

Overall Description for All Core Classes:

All of the required English Language Arts courses are designed around high-quality literary and informational texts to develop the skills of reading, writing, language, speaking and listening that are the foundation for creative and purposeful expression. Emphasis will be placed on close, attentive, and critical reading to tackle, evaluate, and respond to complex texts. Students will develop writing for a variety of purposes including asserting and defending claims, demonstrating knowledge, and conveying what they have thought, felt or experienced. Each grade level addresses the English Language Arts standards by concentrating on literature of a specific thematic orientation or national origin. The course options available under each grade heading are designed to address the needs of students according to ability level.

Note: As of the 2023-2024 school year, English 9, English 10, English 11, and English 12 will be renamed as English I, English II, English III, and English IV, respectively. See “Grade Level” descriptions for reference, as needed.

ENGLISH I

Grade Level: 9
Course Credit: 1 credit, two semesters
Prerequisite: Teacher recommendation

Description:

This course is designed for freshmen who are reading and/or writing below grade level.

Fee: This course requires a student fee.

CP ENGLISH I

Grade Level: 9
Course Credit: 1 credit, two semesters
Prerequisite: Teacher recommendation

Description:

This course is designed for freshmen who are reading and/or writing at or above grade level.

Fee: This course requires a student fee.

HONORS ENGLISH I*

Grade Level: 9
Course Credit: 1 credit, two semesters
Prerequisite: Teacher recommendation

Description:

This course is designed for freshmen who are reading and/or writing significantly above grade level and who demonstrate a strong interest in English. This course is designed to prepare students for English 10 Honors and AP courses at the 11th and 12th grades.

Fee: This course requires a student fee.

ENGLISH II

Grade Level: 10
Course Credit: 1 credit, two semesters
Prerequisite: Teacher recommendation

Description:

This course is designed for students who are reading and/or writing below grade level.

Fee: This course requires a student fee.

CP ENGLISH II

Grade Level: 10
Course Credit: 1 credit, two semesters
Prerequisite: Teacher recommendation

Description:

This course is designed for students who are reading and/or writing at or above grade level.

Fee: This course requires a student fee.

HONORS ENGLISH II*

Grade Level: 10
Course Credit: 1 credit, two semesters
Prerequisite: Teacher recommendation

Description:

This course is designed for students who are reading and/or writing significantly above grade level and who demonstrate a strong interest in English. This course is designed to prepare students for AP courses at the 11th and 12th grades.

Fee: This course requires a student fee.

ENGLISH III

Grade Level: 11
Course Credit: 1 credit, two semesters
Prerequisite: Teacher recommendation

Description:

This course is designed for students who are reading below grade level.

Fee: This course requires a student fee.

CP ENGLISH III

Grade Level: 11
Course Credit: 1 credit, two semesters
Prerequisite: Teacher recommendation

Description:

This course is designed for students who are reading and/or writing at or above grade level.

Fee: This course requires a student fee.

AP ENGLISH - LANGUAGE AND COMPOSITION**

Grade Level: 11,12
Course Credit: 1 credit, two semesters
Prerequisite: Teacher recommendation

Description:

This course is designed for honors-level students with elevated reading comprehension and strong analytical skills. Most of the texts will be informational and argumentative pieces as the course concentrates on the analysis of rhetorical form and strategies. The writing course will focus on expository forms culminating in rhetorical, argumentative and synthesis writing; such expertise is valuable for students seeking

advanced placement in college. Students cultivate their understanding of literature through reading and analyzing texts as they explore concepts like character, setting, structure, perspective, figurative language, and literary analysis in the context of literary works

Fee: This course requires a student fee + AP Exam fee.

CP ENGLISH IV

Grade Level: 12

Course Credit: 1 credit, two semesters

Description: This course offering consists of an exploration of four genres (Mystery & Horror, Non-Fiction, Fantasy and Banned Books). The first semester will include a focus on expository writing. The second semester will focus on interpersonal communication (speech). This course is designed for students who are reading and/or writing at or above grade level.

Fee: This course requires a student fee.

CP CAREER ENGLISH IV

Grade Level: 12

Course Credit: 1 credit, two semesters

Description: This course is designed for seniors that are undecided about the path they will take after high school - whether it be college, military, or the workforce. This course will have the same focus of study and rigor as the 12 CP ELA class, but it will provide differentiated assignment choices that allow students to apply the standards and skills to college, military, and workforce oriented tasks. This course will also integrate community partnerships within our district and provide related assignment/project choices that apply the same skills and standards learned from traditional CP English 12 assignments. Throughout this course, students will be provided with multiple opportunities to explore types of careers and higher education paths that are best suited to their interest, abilities, and passions. This course will have a capstone project that will require students to extensively research a chosen path or field.

Note: This course is only offered at Anderson High School

Fee: This course requires a student fee.

AP ENGLISH: LITERATURE AND COMPOSITION**

Grade Level: 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Teacher recommendation

Description:

This course is offered to honors-level students who have superior ability and interest in literature. Students will study significant literature from major world and American authors - everything from classical Greek tragedy and Elizabethan drama to modern poets and prose writers. This course is of particular value for students seeking advanced placement in college.

Fee: This course requires a student fee + fee for AP Exam

Elective Courses:

The following elective courses are intended to further expand students' opportunities in English Language Arts. Students are encouraged to take any of these courses in addition to their year-long English course.

BOOKS: PERSONAL CHOICES

Grade Level: 10, 11, 12
Course Credit: 0.5 credit, one semester

Description:

Designed for tenth, eleventh or twelfth graders, this course is for students who have a love of reading but find they are unable to read on a regular basis because of time restraints and academic limitations. Students will read self-selected books, participate in discussions and write response journals to reflect upon reading, recommend books to others and build their own reading lists.

This elective course does not fulfill the English credit requirement for graduation.

Fee: This course requires a student fee.

CREATIVE WRITING I

Grade Level: 10, 11, 12
Course Credit: 0.5 credit, one semester

Description:

This course is intended for students interested in learning techniques and skills to produce creative writing in both fiction and nonfiction pieces. It should also help

students to develop sensitivity to their surroundings, to understand the motivations of human nature and to evaluate their own life experiences. Students will be encouraged to express their ideas and observations and to develop their own personal style. They will become familiar with and attempt to produce a variety of written forms which may include, but are not limited to, narration, description, short story, mood piece, creative essay, drama and poetry.

This elective course does not fulfill the English credit requirement for graduation.

CREATIVE WRITING II

Grade Level: 10, 11, 12
Course Credit: 0.5 credit, one semester
Prerequisite: Creative Writing I

Description:

This course is intended for students to continue their learning of techniques and skills to produce creative writing in both fiction and nonfiction pieces. It will further help students develop sensitivity to their surroundings, to understand the motivations of human nature, and to evaluate their own life experiences. Students will continue to express their ideas and observations and further develop their own personal style. As a Creative Writing II student, they will engage in a quarter-long writing workshop, before moving on to produce more elevated works that may include, but are not limited to, narration, description, short story, creative nonfiction, drama, and/or poetry.

This elective course does not fulfill the English credit requirement for graduation.

INTRODUCTION TO JOURNALISM

Grade Level: 9, 10, 11, 12
Course Credit: AHS: 0.5 credit, one semester
THS: 0.5 credit, one semester OR 1 credit, two semesters
Prerequisite: None

Description:

This course will explore the techniques used in print and digital media. Students will learn and apply journalistic writing styles, photojournalism, and copy editing. Selling ads may be required. Although the yearbook and newspaper will still be co-curricular activities, students will be working on both school publications as part of this course. Students taking this course should have strong writing skills. Attendance at events outside of school may be necessary.

This elective course does not fulfill the English credit requirement for graduation.

ADVANCED JOURNALISM - NEWSPAPER

Grade Level: 10, 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Introduction to Journalism and teacher recommendation

Description:

Students who wish to extend their experience and knowledge by continuing their work on school publications will have the opportunity to do so in this class. Selling ads, journalistic ethics, and photography as well as the role of editor will be part of the creation of the school newspaper. Making publication decisions, researching, interviewing, photographing, and reporting for the school publications will be expected. Attendance at events outside of school may be necessary. This is a repeatable course.

NOTE: This course is only offered at Anderson High School.

This elective course does not fulfill the English credit requirement for graduation.

ADVANCED JOURNALISM - YEARBOOK

Grade Level: 10, 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Introduction to Journalism and teacher recommendation

Description:

Students who wish to extend their experience and knowledge by continuing their work on school publications will have the opportunity to do so in this class. Selling ads, journalistic ethics, and photography as well as the role of editor will be part of the creation of the yearbook. Making publication decisions, researching, interviewing, photographing, and reporting for the school publications will be expected. Attendance at events outside of school may be necessary. This is a repeatable course.

This elective course does not fulfill the English credit requirement for graduation.

MEDIA LITERACY

Grade Level: 11, 12
Course Credit: 0.5 credit, one semester

Description:

With the world of technology changing so quickly, developing media literacy is essential to creating strong, current, critical thinkers--and learning to read and write in a variety of media have become essential skills. In this elective course, students will learn to better

understand and analyze complex messages from media such as film, television, news, advertising, video games, magazines, the Internet, and various other forms of media. Students will learn to address the following questions: Who created the message? What is the format of the message? Who is the intended audience of the message? What point of view is represented in the message? What is the accuracy, truth, or credibility of the message?

This elective does not fulfill the English credit requirement for graduation.

NUTRITION AND HEALTHY LIFESTYLES

Grade Level: 9, 10, 11, 12
Course Credit: 0.5 credit, one semester

Description:

This course is designed to provide students with information and lab experiences that will enable them to make healthy food choices based on a variety of lifestyles. There will be basics, such as dietary guidelines, safety and sanitation, meal planning and recipe modification. Other topics include eating disorders, weight management, sports nutrition and current trends in diets, nutrition and wellness factors.

Fee: This course requires a student fee.

CREATIVE AND SAFE COOKING

Grade Level: 9, 10, 11, 12
Course Credit: 0.5 credit, one semester

Descriptions:

This course emphasizes strategies for making economical choices when planning meals. Students will be introduced to the guidelines for selecting appliances, setting up a food budget and buying and storing foods. Safe and sanitary practices are covered in order to prevent food borne illnesses. Making consumer decisions, tips on using space, time and energy efficiently will help students manage their resources while working in the kitchen. Information on basic cooking methods will also give them a background on

how to prepare a wide variety of foods. Regional and international cuisine will also be explored.

Fee: This course requires a student fee.

CHILD DEVELOPMENT

Grade Level: 10, 11, 12

Course Credit: 0.5 credit, one semester

Description:

This course is designed to provide students with foundational skills and awareness that will enable them to make informed decisions about becoming a parent or childcare provider. Anyone who anticipates interaction with children in any capacity will benefit from this course. Topics include parenting readiness, human growth and development, balancing work and family responsibilities and changing family structures. The daily challenges and rewards of parenting will be the focus of cooperative and independent learning activities.

CAREER AND LIFE PLANNING

Grade Level: 9, 10, 11, 12

Course Credit: 0.5 credit, one semester

Description:

This course will provide students with many skills essential for independent living and suggestions for effective decision making related to both short- and long-range goals. Skills for competencies in individual and family economics will be explored along with knowledge for coordinating work and personal life. Topics covered will range from consumerism to interpersonal relationships and responsibilities faced in society by adults in various life stages. The course will utilize many case studies and role-play activities to stress key concepts.

This course fulfills the financial literacy graduation requirement for the Classes of 2023, 2024, and 2025. It does *not* fulfill the financial literacy requirement for the Class of 2026.

Fee: This course requires a student fee.

GLOBAL FOODS

Grade Level: 9, 10, 11, 12

Course Credit: 0.5 credit, one semester

Description:

This course will provide opportunities for students to compare cuisines, ingredients and preferred cooking methods of various cultures. The influence of traditions and regional and cultural perspectives on food choices and culinary practices will be emphasized. Students will examine the issues and conditions that affect the availability and quality of food in the global market, and apply advanced cooking techniques, including the use of specialty and advanced equipment in the preparation of food dishes.

FASHION DESIGN AND SELECTION

Grade Level: 9, 10, 11, 12

Course Credit: 0.5 credit, one semester

Description:

This course is primarily a hands-on course that emphasizes textile and pattern selection and construction techniques. This class would be helpful in developing a portfolio for students interested in majoring in the fashion industry in college. This course requires advanced manual dexterity skills and moderate technical abilities.

Fee: This course requires a student fee.

Fine Arts—Film

FINE ARTS - FILM

Code	Course	Level	Grade	Semesters	Credit	Career Pathways
9510	Introduction to Film		9-12	2	1.0	
9520	Film Studio		10-12	2	1.0	
9530	Media Athletics Collaborative		12	2	1.0	

INTRODUCTION TO FILM

Grade Level: 9, 10, 11, 12

Course Credit: 1 credit, two semesters

Description:

Description: Students will engage with the medium of Film (Media Arts) by learning what it takes to make a movie. Students will first learn about the art of filmmaking and then learn all about the equipment necessary to make a film. Students will then begin to make projects which include: commercials, PSA's, comedy sketches, music videos and narratives. Students will also view films and be asked to do a critical analysis of the films which will help them to constructively discuss film as a modern medium of storytelling.

Fee: This course requires a student fee.

FILM STUDIO

Grade Level: 10, 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: Introduction to Film

Description:

Students will continue their journey into filmmaking by focusing on projects for the school, community and for themselves. Students will use the skills and knowledge gained in Introduction to Film to work on projects that will enhance and promote the vision of the Film Department and allow students to find their voice as a storyteller through film. Students in this course will be required to do larger projects and perhaps use school time in order to make films for the district. This course may be repeated for credit.

Fee: This course requires a student fee.

MEDIA ATHLETICS COLLABORATIVE

Grade Level: 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: Introduction to Film OR Introduction to Photography OR Digital Imaging

Description:

This course expands students' knowledge of Media Arts by focusing on Athletics and the business of Sports Marketing. Students will be put in various positions including graphic designer, photographer, cinematographer, communications, and music development. We will focus on various athletics during each season and create media that will be shared with the community, as well as, create a collegiate portfolio of your work.

In addition, an interview will be required to find your position within the program. This course may be repeated for credit.

Note: This course is only offered at Anderson High School.

Fee: This course requires a student fee.

MEN'S CHORUS

Grade Level: 9, 10, 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: Teacher recommendation and audition

Description:

This group performs unison, two, three and four part music written for tenor and bass voices. Selections are drawn from a variety of musical styles, including classical, folk, popular, sacred, sea chanteys and barbershop music. Special attention is given to vocal techniques and basic note reading skills. Required concerts, assemblies, rehearsals and other programs comprise the performance experience. Solo and Ensemble participation is encouraged. This course may be repeated for credit.

Fee: This course requires a student fee.

WOMEN'S CHORUS

Grade Level: 9, 10, 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Teacher recommendation and audition

Description:

This group studies and performs unison, two, three and four part music written specifically for soprano and alto voices. Selections are drawn from classical, folk, popular, sacred, and musical theatre genres. Special attention is given to vocal technique and basic music reading skills. Required concerts, assemblies, rehearsals and other programs comprise the performance experience. Solo and Ensemble participation is encouraged. This course may be repeated for credit.

Fee: This course requires a student fee.

AHS/THS SINGERS

Grade Level: 9, 10, 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Successful audition with choral director

Description:

Music of all periods is studied and performed at regularly scheduled concerts and assemblies. Ensemble and solo work is emphasized and encouraged. Scales, sight reading, tone quality and singing experience are the determining factors in the selection of members for this top level group. Preparation and practice will be expected from each individual. Required concerts, assemblies, rehearsals and other programs comprise the performance experience. Additional requirements will include OMEA adjudicated events, community service, outside concert attendance and other projects with notification from the director. This course may be repeated for credit.

Fee: This course requires a student fee.

CHAMBER CHOIR*

Grade Level: 10, 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Successful audition with choral director

Description:

This group will be comprised of 12-16 students who will perform music of all genres from Renaissance to pop a cappella. The ensemble will perform at regularly scheduled concerts, assemblies, and other events within the community; these outside events are mandatory. Ensemble and solo work is emphasized and encouraged. Standard music literacy, sight reading, and exemplary tone are the determining factors in the selection of members for this group. Preparation and practice will be expected from each individual. This course may be repeated for credit.

Fee: This course requires a student fee.

AP MUSIC THEORY**

Grade Level: 10, 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: Teacher recommendation

Description:

The ultimate goal of the AP Music Theory course is to develop a student's ability to recognize, understand and describe the basic materials and processes of music that are heard or presented in a score. This goal is reached through students' development of: aural skills, sight-singing, written exercises, composition exercises and analytical exercises.

Fee: This course requires a student fee + fee for AP Exam.

CONCERT BAND

Grade Level: 9, 10, 11, 12

Course Credit: 1.0 credit, two semesters

Prerequisite: Successful audition and teacher recommendation

Description:

Concert Band students work to build musicianship, fundamental skills and performance techniques. The selection of music will vary throughout the year. The Concert Band presents several formal concerts each year. Opportunities are also available for Solo and Ensemble participation as well as Pep and Jazz bands. The band meets five days per week. It is **mandatory** for all Concert Band members to participate in Marching Band. Students who plan to participate in a fall sport should contact the band director to see how accommodations may be made. This course may be repeated for credit.

Fee: This course requires a student fee.

MARCHING BAND (9-WEEK COURSE)

Grade Level:	9, 10, 11, 12
Course Credit:	0.25 credit, 9 weeks
Prerequisite:	Successful audition and teacher recommendation

Descriptions:

The marching band is comprised of members from Concert Band, Wind Ensemble, Percussion, and the Color Guard. Members attend band camp at the end of the summer in preparation for fall performances. Daily rehearsals beyond the school day prepare the class to perform at football games as well as marching band festivals, contests, and parades. There is regional travel for this class including all scheduled football games and competitions. This course may be repeated for credit.

Fee: This course requires a student fee.

PERCUSSION

Grade Level:	9, 10, 11, 12
Course Credit:	1 credit, two semesters
Prerequisite:	Successful audition and teacher recommendation

Description:

Through teacher evaluation, percussion students will be placed in General Percussion or Honors Percussion. Students in Percussion Class work to build musicianship, percussive skills, and performance techniques. The selection of music will be varied throughout the year, consisting of both mallet and snare exercises and etudes, solos, and ensembles. Percussion class presents several formal concerts each year with Concert Band and Wind Ensemble. Opportunities are also available for Pep and Jazz Bands. At the conclusion of the marching season, Orchestra Percussionists attend orchestra two times per week. Solo and Ensemble participation is encouraged. It is **mandatory** for all percussion class members to participate in marching band. This course may be repeated for credit.

Fee: This course requires a student fee.

HONORS PERCUSSION*

Grade Level:	9, 10, 11, 12
Course Credit:	1 credit, two semesters
Prerequisite:	Successful audition and teacher recommendation

Description:

Students in Percussion Class (H) work to build advanced levels of musicianship and employ advanced performance techniques. The selection of music will vary throughout the year and will employ all percussion instruments. Music will include band arrangements, etudes, solos, and ensembles. Percussion class presents several formal concerts each year with Concert Band and Wind Ensemble. Students are required to participate in Solo and Ensemble and/or Honor Band as well as Pep Band. At the conclusion of the marching season, those students also participating in the Symphonic Orchestra will attend orchestra two times per week. Honors Percussion is by audition only and auditions occur in the spring of the previous school year. It is **mandatory** for all members of Percussion class to participate in marching band. This course may be repeated for credit.

Fee: This course requires a student fee.

WIND ENSEMBLE*

Grade Level: 9, 10, 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: Successful audition and teacher recommendation

Description:

Wind Ensemble students work to build advanced levels of musicianship and employ advanced performance techniques. A variety of band literature will be studied and performed. Students will study fundamental concepts of music theory, music history, and ear training throughout the course. Students will participate in community service based on sharing their talents outside of school. The Wind Ensemble presents several formal concerts each year. All students will participate in Solo and Ensemble and/or Honor Band, as well as Pep Band. At the conclusion of the marching season, Symphonic Orchestra members will attend orchestra two times per week. Wind Ensemble is by audition only. Auditions occur in the spring of the previous school year. It is **mandatory** for all Wind Ensemble members to participate in Marching Band.

Students who plan to participate in a Fall sport should contact the band director to see how accommodations may be made. This course may be repeated for credit.

Fee: This course requires a student fee.

PHILHARMONIC ORCHESTRA

Grade Level: 9, 10, 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: Successful audition with orchestra director

Description:

Philharmonic meets as a string orchestra daily. The Philharmonic curriculum develops technical string playing skills through string orchestra repertoire. All styles and types of music are studied to assure a well-rounded orchestra experience. The orchestra performs at required concerts throughout the year. Additional requirements may include adjudicated events and outside concert attendance. This course may be repeated for credit. **Fee: This course requires a student fee.**

SYMPHONIC ORCHESTRA*

Grade Level: 9, 10, 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: Successful audition with orchestra director

Description:

String Orchestra meets daily, one day with the wind and percussion players during the marching season and two days during the concert band season. The Symphonic Orchestra curriculum includes both string and full orchestra repertoire, and students from the orchestra are selected to play in Chamber Orchestra. All styles and types of music are studied to assure a well-rounded orchestral experience. The orchestra performs at various assemblies and required concerts throughout the year. Additional requirements may include community service, outside concert attendance, extended rehearsals and OMEA adjudicated events. This course may be repeated for credit.

Fee: This course requires a student fee.

DRAWING AND PAINTING I

Grade Level: 9, 10, 11, 12

Course Credit: 1 credit, two semesters

Description:

Drawing and Painting I is a two semester, hands-on, basic training course to improve both drawing and painting skills. Students will learn about the elements and principles of design, as well as how to create effective compositions through a variety of materials and techniques. There will be integration of art history throughout the course. Critical review of work during this course will be both written and verbal as students will participate in class critiques. Students will be required to keep a sketchbook throughout the course for both classwork and homework.

Fee: This course requires a student fee.

DRAWING AND PAINTING II

Grade Level: 10, 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Drawing and Painting I

Description:

Drawing and Painting II continues to build student skills and knowledge of a wide variety of techniques and use of materials. Students will continue to develop their own artistic style, creative self-expression and knowledge of the fundamentals. They will increase their study of art history as they explore a variety of artists and art movements throughout history. After completing this course, students will be prepared for a future in higher level art classes should they choose to continue on. Student critique will be both verbal and written. They will begin to work more independently as they begin to find their own unique art style. They will still be required to keep a sketchbook for classwork and homework. Students may choose to purchase additional supplies for this course.

Fee: This course requires a student fee.

DRAWING AND PAINTING III*

Grade Level: 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Drawing and Painting II

Description:

Students will begin to master their own individual artistic style as they work towards creating a cohesive body of work. They will continue to build on their knowledge of art history through the examination of many different artists and their styles. After completing this course, students will be prepared for a future in higher level art courses should they decide to continue on into Drawing and Painting IV or AP Drawing, as well as art at the collegiate level. Students will continue to work more independently and projects will become more self-directed. Student critique will be more frequent. They will still be required to keep a sketchbook of drawings and homework assignments. Students may choose to purchase additional supplies for this course.

Fee: This course requires a student fee.

AP DRAWING**

Grade Level:	12
Course Credit:	1 credit, two semesters
Prerequisite:	Drawing and Painting III and teacher recommendation

Description:

The AP Drawing Portfolio is designated for work that focuses on the use of mark-making, line, surface space, light and shade, and composition. Students should consider marks that can be used to make drawings, the arrangement of marks, the materials and processes used to make marks, and relationships of marks and ideas. Students can work with any materials, processes, and ideas. Drawing (analog and digital), painting, printmaking, and mixed media work are among the possibilities for submission. Still images from videos or film are accepted. Composite images may be submitted.

Fee: This course requires a student fee + fee for AP Exam.

SCULPTURE AND CERAMICS I

Grade Level:	9, 10, 11, 12
Course Credit:	1 credit, two semesters

Description:

Anyone can be successful in this highly popular class. If students enjoy working with their hands, this class is a great choice. Students will learn basic hand-building clay techniques as well as glazing and other finishing processes. Completing a variety of projects using different mediums, students will learn how to make sculptures and ceramic pottery using the elements and principles of 3-D design. Students will also explore works created by sculptors and potters through the ages.

Fee: This course requires a student fee.

SCULPTURE AND CERAMICS II

Grade Level:	10, 11, 12
Course Credit:	1 credit, two semesters
Prerequisite:	Sculpture and Ceramics I

Description:

This course emphasizes self-expression and interpreting what an individual's art says about them. Students will hone in on personal technique and design skills, while still

learning new techniques and working with new mediums. Students will be introduced to the pottery wheel to create a variety of functional vessels. Students will also be exploring advanced hand-building and finishing techniques. We will continue to explore historical and current three-dimensional artwork, artists, materials, and techniques.

Fee: This course requires a student fee.

SCULPTURE AND CERAMICS III*

Grade Level: 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Sculpture and Ceramics II

Description:

Students have already learned many sculptural and functional techniques and have started to create their own style. Students will be developing their voices through research and the creation of their artwork. Using prompts given by the instructor, students will design and create solutions in the method and material that best expresses their artistic styles. They will also continue to advance their skills using the pottery wheel. Students will explore the historical and current art as it applies to their personal style and choice of medium.

Fee: This course requires a student fee.

AP 3-D ART AND DESIGN**

Grade Level: 12
Course Credit: 1 credit, two semesters
Prerequisite: Sculpture and Ceramics III and teacher recommendation

Description:

AP 3-D Art and Design Portfolio is designed for work that focuses on the use of three-dimensional (3-D) elements and principles of art and design, including point, line, shape, plane, layer, form, volume, mass, occupied/unoccupied space, texture, color, value, opacity, transparency, time, unity, variety, rhythm, movement, proportion, scale, balance, emphasis, contrast, repetition, connection, juxtaposition, and hierarchy. Students should consider how materials, processes, and ideas can be used to make work that involves space and form. Students can work with any materials, processes, and ideas. Figurative or non-figurative sculpture, architectural models, metal work, ceramics, glasswork, installation, performance, assemblage, and 3-D fabric/fiber arts are among the possibilities for submission. Still images from videos or film are accepted. Composite images may be submitted.

Fee: This course requires a student fee + fee for AP Exam.

INTRODUCTION TO PHOTOGRAPHY

Grade Level: 9, 10, 11, 12
Course Credit: 1 credit, two semesters

Description:

The 21st Century is all about visual culture. Students will be introduced to the history of the photographic image and learn how to create photographs that have an impact. In doing so, you will also learn how to read images and have a better understanding of contemporary visual media. You will learn both digital and traditional methods for editing and manipulating your images, including learning the basics of Adobe Creative Suite CC. You will learn how to create fine art photography, as well as exploring professional paths. You will need access to a digital camera (see teacher for current camera requirements before summer) and need to be able to spend time outside of class making images.

Fee: This course requires a student fee.

ADVANCED PHOTOGRAPHY*

Grade Level: 10, 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Teacher recommendation

Description:

This course will expand your knowledge of the art of photography and visual culture, using both traditional and digital techniques. You will combine previously learned skills with even more creative ways to make, manipulate, and present photographic images. You will also begin to have more freedom to develop your own personal vision. Photography requires a high level of maturity and initiative because much of the work needs to be done outside of school for ideal lighting and exploring more personal subject matter.

Fee: This course requires a student fee.

DIGITAL IMAGING I

Grade Level: 9, 10, 11, 12
Course Credit: 1 credit, two semesters

Description:

Computers and technology are driving nearly every aspect of our culture including contemporary art. In this class, students will primarily work with computers as they gain an understanding of the basic design principles used in fine art, graphic design, and animation. A variety of programs including Adobe Photoshop, Adobe Illustrator and free online resources will be introduced to students to use as they make choices on how to develop their creative skills and better understand styles of art. This is an essential class for future art majors to stay up-to-date in the digital age.

Fee: This course requires a student fee.

DIGITAL IMAGING II

Grade Level: 10, 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Digital Imaging

Description:

This class is an enrichment opportunity for digital imaging students. The course uses a variety of computer-based media, digital tools and other design media. Students will build upon previously learned skills in fine art, graphic design and animation as they work toward becoming more effective visual communicators and consumers. Throughout the course, students will refine their knowledge of Adobe Photoshop and Adobe Illustrator as well as various free online tools. Students will learn to plan some of their own independent projects throughout the year in addition to teacher-led assignments. By the end of this course, students should leave with a variety of artworks in their digital portfolios that can be used to showcase their work during college, vocational training, and job-related interviews. This is an essential class for art majors to stay up-to-date in the digital age. This course teaches essential skills which can transfer to disciplines such as engineering, architecture and business.

Fee: This course requires a student fee.

DIGITAL IMAGING III*

Grade Level: 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Digital Imaging and Digital Imaging II

Description:

The primary goal of this course is for Digital Imaging 3 students to determine the criteria used in the personal selection of art for an accomplished portfolio as students demonstrate skilled artisanship to complete a collection of student-choice projects. With

these projects, students will be expected to broaden their selection of materials and techniques while demonstrating technical skill. Students will conceptualize personally relevant ideas and expand visual literacy strategies using carefully selected elements and principles of art to express personal expression. Students will have access to Adobe Photoshop and Illustrator in addition to free online software in order to plan and create their projects.

Students will learn skills in observation, analysis and communication about their finished projects as well as projects created by their peers. By the end of this course, students should have developed a variety of artworks in their digital portfolios that can be used to showcase their work during college, vocational training, and job-related interviews. This is an essential class for art majors to stay up-to-date in the digital age. This course teaches essential skills which can transfer to disciplines such as graphic design, engineering, animation, architecture and business.

Fee: This course requires a student fee.

AP 2-D ART AND DESIGN**

Grade Level: 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: 2 credits of art and teacher recommendation

Description:

AP 2-D Art and Design Portfolio Exam: This portfolio is designated for work that focuses on the use of two-dimensional (2-D) elements and principles of art and design, including point, line, shape, plane, layer, form, space, texture, color, value, opacity, transparency, time, unity, variety, rhythm, movement, proportion, scale, balance, emphasis, contrast, repetition, figure/ground relationship, connection, juxtaposition and hierarchy. Students should consider how materials, processes, and ideas can be used to make work that exists on a flat surface. Students can work with any materials, processes and ideas. Graphic design, digital imaging, photography, collage, fabric design, weaving, fashion design, fashion illustration, painting and printmaking are among the possibilities for submission. Still images from videos or films are accepted. Composite images may be submitted.

Fee: This course requires a student fee + fee for AP Exam.

AP ART HISTORY**

Grade Level: 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: History, Art or English teacher recommendation

Description:

The AP Art History course gives the serious student the opportunity to explore the history of art from ancient times to the present. The visual language of humans illuminates each age and culture more clearly than any other form of communication. Through readings, research, viewing images and videos, virtual and real visits to art museums and galleries, students will come to know the significant artists and artworks from diverse historical and cultural contexts. We will examine the development of trends, movement and events in art and will see how they reflected or affected the times in which they occurred. Writing skills will be important in the description, analysis and comparison of these works. Students will be asked to look, research, discuss and write about art in relation to such issues as patronage, gender, politics, religion and ethnicity. They will be expected, through carefully structured assignments, to exhibit an extensive scholarship in conjunction with these experiences in preparation for the AP Art History exam.

Fee: This course requires a student fee + AP Exam fee.

Fine Arts - Theatre

FINE ARTS - THEATRE

Code	Course	Level	Grade	Semesters	Credit	Career Pathways
9910	Introduction to Theatre		9-12	2	1.0	
9920	Advanced Theatre Studio		10-12	2	1.0	
9930	Technical Theatre		10-12	2	1.0	

INTRODUCTION TO THEATRE

Grade Level: 9, 10, 11, 12

Course Credit: 1 credit, two semesters

Description:

This course is a fun and exciting way for students to engage in storytelling by using themselves as the medium. By studying specific histories and cultures, learning and applying language and vocabulary specific to theatre arts, and engaging in projects that ask the student to apply knowledge in a creative way. Students will also have fun, gain self-esteem and confidence, and be able to use their creativity in new and dynamic ways to tell stories of others and themselves.

ADVANCED THEATRE STUDIO

Grade Level: 10, 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: Introduction to Theatre

Description:

Students in the Advanced Theatre Studio class will continue their education of theatre by participating in units of study that are engaging in a variety of ways. Each unit allows students to grow as artists by understanding how history, culture and social issues impact dramatic texts. Students participate in four units of study including Advanced Actor training, Advanced Improvisation or Sketch Comedy, Musical Theatre Dance or Stage Combat. This class focuses on students as leaders, creators and directors, as well as advancing their performance, literary and technical skills. Lastly, students will connect their learning by applying it to real-world projects presented to the public, which

means they must be available for performances outside of the school day. This course may be repeated for credit.

Fee: This course requires a student fee.

TECHNICAL THEATRE

Grade Level: 10, 11, 12

Course Credit: 1 credit, two semesters

Description:

Students will work on projects that improve the performance spaces within the building. Students will also learn all areas of technical theatre and expand on their skills and knowledge of new areas to allow them to grow as a technical theatre artist. There is not a prerequisite for this course; however, students are strongly encouraged to enroll in the Introduction to Theatre course prior to taking the Technical Theatre course. This course may be repeated for credit.

Fee: This course requires a student fee.

ALGEBRA I

Grade Level: 9
Course Credit: 1 credit, two semesters

Description:

In Algebra I, students will focus on the following critical areas: Developing an understanding of the relationships between quantities and reasoning with equations, comparing and contrasting linear and exponential relationships, using descriptive statistics to describe a data set, creating and manipulating expressions and equations to solve problems, and developing an understanding of quadratic functions and how they can be used to model situations.

GEOMETRY

Grade Level: 9, 10, 11
Course Credit: 1 credit, two semesters
Prerequisite: Algebra I

Description:

Geometry includes analysis of plane, solid, and coordinate geometry as they relate to both abstract mathematical concepts as well as real-world problem situations. Topics include logic and proof, parallel lines and polygons, perimeter and area analysis, volume and surface area analysis, similarity and congruence, trigonometry, circles and analytic geometry. Additionally, students will study concepts in set theory and probability. Emphasis will be placed on developing critical thinking skills as they relate to logical reasoning and argument.

ALGEBRA II

Grade Level: 10, 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Geometry

Description:

Algebra II is traditionally the third course in a high school mathematics sequence. Students will be able to problem solve and model real-world phenomena using skills based in linear equations, polynomials, quadratic functions, exponential and logarithmic equations, probability, and trigonometry.

CP PRECALCULUS

Grade Level:	11, 12
Course Credit:	1 credit, two semesters
Prerequisite:	Algebra II and teacher recommendation

Description:

This course is designed for the college-bound student who needs a solid math background. Topics include advanced equation solving, functions and their graphs, polynomial and rational functions, exponential and logarithmic functions, trigonometry, analytic trigonometry and applications and complex numbers. Additional topics may include conic sections, matrices and polar coordinates.

AP PRECALCULUS**

Grade Level:	11, 12
Course Credit:	1 credit, two semesters
Prerequisite:	Honors Algebra II and teacher recommendation

Description:

In AP Precalculus, students explore everyday situations using mathematical tools and lenses. They will learn how to observe, explore, and build mathematical meaning from dynamic systems, an important practice for thriving in an ever-changing world. AP Precalculus prepares students for other higher-level mathematics and science courses. Additionally, students apply their understanding of functions by constructing and validating appropriate function models for scenarios, sets of conditions, and data sets, thereby gaining a deeper understanding of the nature and behavior of each function type. Students learn to select mathematical models-based characteristics of a bivariate data set; characteristics of covarying quantities and their relative rates of change; or a set of characteristics such as zeros, asymptotes, and extrema. Students also identify, interpret, and apply information from a function model for a given context or data set, subject to assumptions and limitations related to the context.

Fee: This course requires a student fee + AP Exam fee.

APPLIED MATHEMATICS

Grade Level:	12
Course Credit:	1 credit, two semesters
Prerequisite:	Algebra II

Description:

In Applied Mathematics the students will focus on four critical areas: Graph theory using Desmos, topics in consumer math, topics focused on probability and statistics, and a culminating project connected to our community partners and community service.

CP INTRODUCTION TO COLLEGE MATHEMATICS

Grade Level: 12
Course Credit: 1 credit, two semesters
Prerequisite: Algebra II

Description:

Intro to College Mathematics will serve as an entry level course to College Readiness and College Mathematics. Throughout the first semester students will strengthen their understanding of topics covered on the ACT with the goal of meeting criteria required to enroll in credit bearing math courses in college. These topics include but are not limited to matrices, algebraic equations, data analysis, geometric problem-solving, trigonometry, and rational and radical expressions and equations. In the second semester, students will be exposed to a variety of mathematics that they may face in their first year of college, including but not limited to probability and statistics, quantitative reasoning topics, discrete mathematics and modeling real world phenomena.

CP SURVEY OF STATISTICS AND CALCULUS

Grade Level: 12
Course Credit: 1 credit, two semesters
Prerequisite: Precalculus

Description:

This course will provide a working knowledge of the topics found in the two most often required courses for freshmen in college, Statistics and Calculus. One semester will focus on probability, descriptive statistics, and inferential statistics. Topics will be reinforced via the use of projects and puzzles, and real life data will be explored using spreadsheets. The other semester will focus on limits, derivatives and integrals. These techniques help explain how things change over time and how to optimize for that change. Calculus is used in ways you may not recognize: From knowing when to expand your business to building hurricane proof structures to understanding how medicine is absorbed in the body and traveling to the stars.

AP STATISTICS**

Grade Level:	10, 11, 12
Course Credit:	1 credit, two semesters
Prerequisite:	Teacher recommendation

Description:

AP Statistics focuses on the study of probability and statistics, both descriptive and inferential. The course emphasizes analysis and interpretation more than computation. The course consists of nine units: (1-2) Exploring One- and Two-Variable Data; (3) Collecting Data: planning and conducting a study, (4) Probability, Random Variables, and Probability Distributions, (5) Sampling Distributions, and (6 - 9) Inference for Categorical and Quantitative Data.

Fee: This course requires a student fee + AP Exam fee.

AP CALCULUS AB**

Grade Level:	11, 12
Course Credit:	1 credit, two semesters
Prerequisite:	Honors Precalculus and teacher recommendation

Description:

AP Calculus AB is a one-year course designed to be the equivalent of a first semester college calculus course devoted to topics in differential and integral calculus. Before studying calculus, all students should complete and show sufficient mastery of four years of secondary mathematics designed for the college-bound student. Through the use of the big ideas of calculus (e.g., modeling change, approximation of limits, and analysis of functions), AP Calculus AB becomes a cohesive whole, rather than a collection of unrelated topics. Successful completion of this course prepares students for the AP Calculus AB examination.

Fee: This course requires a student fee + AP Exam fee.

AP CALCULUS BC**

Grade Level:	12
Course Credit:	1 credit, two semesters
Prerequisite:	Honors Precalculus and teacher recommendation

Description:

AP Calculus BC is a full-year course in the calculus of functions of a single variable. It includes all topics taught in Calculus AB plus additional topics such as arc length, techniques of integration, sequences, series, vector-valued functions and polar coordinates. A Calculus AB subscore is reported based on performance on the portion of the Advanced Placement Calculus BC Exam devoted to Calculus AB topics.

Fee: This course requires a student fee + AP Exam fee.

Physical Education / Health

PHYSICAL EDUCATION/HEALTH

Code	Course	Level	Grade	Semesters	Credit	Career Pathways

HEALTH AND WELLNESS

Grade Level: 9, 10, 11, 12
Course Credit: 0.5 credit, one semester

Description:

This course is designed to equip students with the knowledge, skills and awareness necessary for making responsible choices that will lead to optimal wellness. Our goal is to help students maintain a healthy state of physical, mental and social well-being. The topics of study include self-esteem, stress management, physical fitness, nutrition, healthy relationships, reproductive health, substance abuse and addiction, CPR/AED training, organ and tissue donation, infectious and lifestyle diseases.

This course is required for ALL students.

Fee: This course requires a student fee.

INTRO TO PHYSICAL EDUCATION

Grade Level: 9, 10, 11, 12
Course Credit: 0.25 credit, one semester

Description:

Students will participate in a variety of individual, team and lifelong sports, as well as learn physical fitness activities. Students will engage in physical activities that promote skill enhancement, goal setting and lifelong enjoyment. Students will learn to work with others in authentic physical activity to achieve a common goal and learn cooperation and sportsmanship concepts. Some examples of physical fitness activities are tennis, swimming, flag football, volleyball, badminton, physical fitness assessments, and pickleball.

Fee: This course requires a student fee.

NOTE: Unless using the FHSD PE waiver, this course is required for all students in addition to completion of one PE elective.

LIFEGUARDING, CPR AND FIRST AID (BLENDED)

Grade Level: 10, 11, 12

Course Credit: 0.25 credit, one semester

Description:

This course will be a combination of online learning and face-to-face instruction. The primary purpose of the American Red Cross Blended Lifeguarding course is to provide entry-level lifeguard participants with the knowledge and skills to prevent, recognize and respond to aquatic emergencies and to provide professional-level care for breathing and cardiac emergencies, injuries and sudden illnesses until emergency medical services (EMS) personnel take over. This program offers a choice of Lifeguarding/First Aid/CPR/AED courses to meet the various training needs of a diverse audience. This course combines online learning with in-person skill sessions conducted by a Red Cross certified instructor. Participants in blended learning courses acquire the same knowledge and skills as those in traditional classroom training courses. **Participants in the Lifeguarding program must be 15 years of age on or before the last scheduled session of the course.** This class does require a prerequisite swim test that will take place the first two days of class.

This class is not offered at Anderson High school. Students at Anderson who wish to take the course may be able to take it at Turpin.

Fee: This course requires a student fee.

When following the extended outline of the Blended Learning Lifeguarding course, homework is assigned between sessions. Examples of work include:

- Online assignments
- End of chapter review questions
- Reading assignments

- Required course video segments
- Skill demonstrations in the water

DANCE AND FITNESS

Grade Level: 9, 10, 11, 12
Course Credit: 0.25 credit, one semester

Description:

This is an ideal class for students who enjoy creative movement, musical variety and collaborating with others. Basic movement styles will be explored and may include, but are not limited to the following: yoga, pilates, hip-hop, ballet, tap, Zumba, aerobic, tinikling, folk, line dancing, square dancing and other forms of creative dance. Students do not need to be experienced dancers but will be required to choreograph dance routines individually and in groups.

Fee: This course requires a student fee.

COMPETITIVE GAMES

Grade Level: 9, 10, 11, 12
Course Credit: 0.25 credit, one semester

Description:

This is an ideal class for students who enjoy vigorous physical activity, competition and teamwork through a variety of team and individual sporting events. The class has a competitive tournament-style format for many of the games. Events in the course will include, but are not limited to: basketball, volleyball, soccer, handball and floor hockey. The class will also emphasize physical safety and athletic training and will encourage teamwork as well as athletic strategies and tactics.

Fee: This course requires a student fee.

STRENGTH TRAINING AND CONDITIONING

Grade Level: 9, 10, 11, 12
Course Credit: 0.25 credit, one semester

Description:

This class is designed for students who are interested in improving strength, muscular endurance and power. This class helps students set strenuous but attainable goals for

enhancing their health and physical fitness. Exercise, proper nutrition, weight control and cardiovascular development will be studied. When possible, professional strength coaches and weightlifting experts will work with students to foster greater flexibility and agility training. A physical fitness evaluation will be given to each student and a program will be developed to satisfy individual needs and goals.

Fee: This course requires a student fee.

ADVANCED STRENGTH TRAINING

Grade Level: 10, 11, 12

Course Credit: 0.25 credit, one semester

Prerequisite: Strength and Conditioning or Varsity Coach Signature

Description:

The daily goal of this course is to promote improved physical and cardiovascular health through strength training and cardiovascular activities. The objectives are flexible to meet the needs and desires of each individual. Each student will have a daily objective/workout regimen to use and follow. The objective is to learn proper technique, use that technique to add strength to the muscular and skeletal system, promote flexibility and balance and create a healthier and more physically fit individual. Along with this should be an improvement in mental health as confidence builds through seeing results. This class can be taken by anyone, but lifting/cardio experience is preferred. As students learn the techniques and what their body can achieve, they can begin to set measurable goals which they can track with data collection. The intensity and lift variation will change based on student skill levels, strength and mastery of the techniques; students will have the flexibility to achieve their personal best

Fee: This course requires a student fee.

LEISURE GAMES AND ACTIVITIES

Grade Level: 9, 10, 11, 12

Course Credit: 0.25 credit, one semester

Description:

This is an ideal course for students who enjoy leisure sports and activities. The course will combine indoor and outdoor activities which will foster lifetime enjoyment of games and the social interactions they can provide. Events in the course may include but are not limited to corn hole, ping pong, golf, bowling, hacky sack, Frisbee, badminton, darts and strategy games. The only dress requirement for this course is school attire and appropriate footwear.

Fee: This course requires a student fee.

OFFICIATING

Grade Level: 9, 10, 11, 12

Course Credit: 0.25 credit, one semester

Description:

The purpose of this course is to enable students to acquire knowledge of sport rules and regulations, develop skills in officiating selected sports, improve skills in specified team sports and maintain or improve health-related fitness. The content should include but be limited to the following: safety practices, rules, terminology, etiquette, history of the sport, sportsmanship, correct techniques in performing skills, correct signals for officiating, umpiring and officiating games, consumer issues, benefits of participation, fitness activities and assessment of skills and fitness. The sports offered may include but are not limited to basketball, flag football, soccer, softball and volleyball.

CP BIOLOGY

Grade Level:	9
Course Credit:	1 credit, two semesters
Prerequisite:	Teacher recommendation

Description:

This course is a survey course in biology for freshmen. Students will focus on several areas of biology including the cell and its functions, biochemistry, genetics, ecology, weather and current events in biology. In addition to class readings and discussions, students will participate in a variety of labs and other hands-on activities in order to gain knowledge of these subject areas.

Fee: This course requires a student fee.

HONORS BIOLOGY*

Grade Level:	9
Course Credit:	1 credit, two semesters
Prerequisite:	Teacher recommendation

Description:

This is a fast-paced course that requires students to use critical thinking skills and apply them to classroom activities, lab experiences and discussions of current events. This is an introductory course in biology that will cover topics such as the cell structure and function, genetics, classification, and the diversity of life. Students may be required to participate in the district science fair or complete an equivalent project.

Fee: This course requires a student fee.

AP BIOLOGY**

Grade Level:	10, 11, 12
Course Credit:	1 credit, two semesters
Prerequisite:	Biology and teacher recommendation
Co-Requisite:	Chemistry

Description:

AP Biology is equivalent to an introductory collegiate general biology course and is designed for those students who have a strong interest in the life sciences. This course includes advanced instruction of topics covered in Biology such as basic chemistry, cellular structure and function, genetics, evolution, ecology and classification. New

topics include: organic chemistry, membrane structure and function, molecular genetics, cell communication and human biology. The goal of this course is to prepare students to take the Advanced Placement Biology Exam.

Fee: This course requires a student fee + AP Exam fee.

PHYSICAL SCIENCE

Grade Level: 10
Course Credit: 1 credit, two semesters
Prerequisite: Teacher recommendation

Description:

This is the second course in the series of biology, physical science and earth science. This course will explore many aspects of the application of chemistry, physics, and earth/space science. Emphasis will be placed on laboratory experiences, engaging projects based on real-world problems, and further development of reading and writing skills in science.

Fee: This course requires a student fee.

CP PHYSICAL SCIENCE

Grade Level: 10
Course Credit: 1 credit, two semesters
Prerequisite: Algebra I and teacher recommendation

Description:

A college preparatory course intended for sophomores, this course covers the fundamentals of the physical sciences: chemistry, physics, earth and space science. Students will have the opportunity to design their own experiments and carry out laboratory investigations on the various topics explored in this course; which include atomic structure, chemical bonding and reactions, stars, laws of motion, energy, waves, and electricity.

Fee: This course requires a student fee.

HONORS CHEMISTRY*

Grade Level: 10, 11
Course Credit: 1 credit, two semesters
Prerequisite: Algebra I and teacher recommendation

Co-Requisite: Geometry

Description:

This is an advanced level first-year chemistry course for science-motivated students. Topics include identification of elements, compounds and mixtures, metric system, density, writing of chemical formulas and equations, stoichiometry, energy changes, gas laws, periodic law, chemical bonding, relationships between phases of matter, water solutions, ionization, acids, bases and salts. The course will emphasize challenging laboratory experiments, critical thinking and problem-solving. A strong background in honors mathematics is highly recommended.

Fee: This course requires a student fee.

CP CHEMISTRY

Grade Level: 10, 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: Algebra I and teacher recommendation

Co-Requisite: Geometry

Description:

This is a course for the college-bound student covering basic chemical theory and laboratory skills. Topics covered include atomic structure, chemical formulas and equations, stoichiometry, energy changes, chemical bonding, gas laws, and acids and bases. This course is designed to engage students in activities and laboratory experiences that emphasize real world applications of chemistry.

Fee: This course requires a student fee.

AP CHEMISTRY**

Grade Level: 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: Chemistry and teacher recommendation

Co-Requisite: Algebra II

Description:

AP Chemistry is equivalent to an introductory collegiate general chemistry course and is designed to enable students to be successful on the Advanced Placement Examination in Chemistry. Students should expect extensive writing assignments and labs and more rigorous mathematical treatment of topics than in the first-year chemistry course. Many topics from the first-year chemistry course will be studied in more depth. New topics will

include: reaction kinetics, electrochemistry, non-ideal equilibria, complex equilibria and thermodynamics. Students are required to attend and complete the necessary lab components of the course.

Fee: This course requires a student fee + AP Exam fee.

EARTH AND ENVIRONMENTAL SCIENCE

Grade Level: 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Teacher recommendation

Description:

This is the 3rd course in a series of biology, physical science and earth science needed for graduation. This course will explore a broad range of general topics in earth and environmental science. Students will learn about a variety of topics including rocks, minerals, plate tectonics, weather, oceans, climate resources, pollution, and energy.

Fee: This course requires a student fee.

CP PHYSICS

Grade Level: 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Geometry and teacher recommendation
Co-Requisite: Algebra II or equivalent

Description:

This course is designed as a survey of physics with an emphasis on the application of mathematics to model the physical world. A solid foundation in algebra and strong graphing skills are necessary. Topics studied include motion, forces, principles of work, energy and momentum, sound, light, atomic and nuclear physics, electricity and magnetism.

Fee: This course requires a student fee.

HONORS PHYSICS

Grade Level: 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Geometry and teacher recommendation
Co-Requisite: Algebra II or equivalent

Description:

This course emphasizes the techniques of problem solving and laboratory investigation. The topics to be covered include: motion, forces, principles of work, energy and momentum, sound, light, atomic and nuclear physics, electricity and magnetism. Theoretical concepts will be related to practical applications. This course is recommended for science and math oriented students. Strong math skills are needed.

Fee: This course requires a student fee.

AP PHYSICS C: MECHANICS**

Grade Level: 11, 12
Course Credit: 1 credit, two semesters
Co-Requisite: Honors Precalculus

Description:

AP Physics C: Mechanics is equivalent to a first-semester college course in calculus-based physics. The course covers kinematics, Newtonian mechanics (including rotational dynamics and angular momentum), work, energy, momentum, oscillations and gravitation. Introductory calculus skills are taught as a part of the course and used throughout the year. The goal of this course is to prepare students to take the Advanced Placement Physics C: Mechanics Exam.

Fee: This course requires a student fee + AP Exam fee.

AP PHYSICS C: ELECTRICITY AND MAGNETISM**

Grade Level: 12
Course Credit: 1 credit, two semesters
Prerequisite: AP Physics I or AP Physics C: Mechanics and teacher recommendation
Co-Requisite: AP Calculus AB or AP Calculus BC

Description:

AP Physics C: Electricity and Magnetism is equivalent to a second-semester college course in calculus-based physics. The course covers electrostatics, electric circuits and magnetism. Advanced calculus skills are developed and used throughout the course. The goal of this course is to prepare students to take the Advanced Placement Physics C: Electricity and Magnetism Exam.

Fee: This course requires a student fee + AP Exam fee.

ASTRONOMY

Grade Level:	11, 12
Course Credit:	0.5 credit, one semester
Prerequisite:	Physical Science or Chemistry

Description:

This one-semester course is for any student interested in the universe and how it works on an astronomical scale. Students will learn basic astronomy skills like stargazing, charting and identifying constellations, using optical telescopes, using radio-telescopes, as well as others. The history and development of astronomy and astronomical tools will also be discussed. A portion of the semester will be dedicated to the study of the origin, evolution, and fate of the universe as a whole. This course will apply appropriate mathematical investigations for each topic and is designed to be accessible to a diverse population of math abilities. This class will meet at night at least once during the semester and friends/families are invited to attend.

Fee: This course requires a student fee.

NUTRITIONAL BIOCHEMISTRY

Grade Level:	11, 12
Course Credit:	1 credit, two semesters
Prerequisite:	Chemistry and teacher recommendation

Description:

Nutritional Biochemistry is a fun elective where students explore the everyday science behind health, nutrition and cooking. Students will learn about artificial and natural flavors (Cincinnati being a flavor hub), dieting, eating for athletics, gluten allergies, GMOs, trans fats, vegetarianism and more. The course will explore these topics in both the science lab and cooking lab.

Fee: This course requires a student fee.

HUMAN BODY SYSTEMS

Grade Level:	10, 11, 12
Course Credit:	1 credit, two semesters

Description:

This is the first course in the Project Lead the Way (PLTW) Biomedical Pathway. Students examine the interactions of human body systems as they explore identity, power, movement, protection, and homeostasis in the body. Exploring science in action, students build organs and tissues on a skeletal Maniken®; use data acquisition software to monitor body functions such as muscle movement, reflex and voluntary action, and respiration; and take on the roles of biomedical professionals to solve real-world medical cases.

Fee: This course requires a student fee.

FORENSIC SCIENCE

Grade Level: 10, 11, 12

Course Credit: 0.5 credit, one semester

Prerequisite: Biology

Description:

This one semester course is an elective, inquiry-oriented science class that will focus on criminal forensics. Through a sequence of lab based activities, students will gain an understanding and appreciation of the role of science in solving crimes. Topics may include fingerprinting, entomology, pattern impressions, blood-spatter, DNA, crime scene processing, ballistics, fiber and hair analysis, document analysis, anthropology, and arson.

Fee: This course requires a student fee.

MEDICAL INTERVENTIONS

Grade Level: 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: Human Body Systems

Description:

This is the second course in the Project Lead the Way (PLTW) Biomedical Pathway. Students investigate how to prevent, diagnose, and treat disease. Students explore how to detect and fight infection, screen and evaluate the code in human DNA, evaluate cancer treatment options, and prevail when the organs of the body begin to fail. Through real-world cases, students are exposed to a range of interventions related to immunology, surgery, genetics, pharmacology, medical devices and diagnostics.

Fee: This course requires a student fee.

INTRODUCTION TO ENGINEERING DESIGN

Grade Level:	9, 10, 11, 12
Course Credit:	1 credit, two semesters
Prerequisite or Co-Requisite:	Algebra I

Description:

This is the first course in the Project Lead the Way (PLTW) Engineering Pathway. This course is designed to introduce the field of engineering and engineering technology to students. Here we take an idea through the design process to document its development, fabricate, test, and present it. Students dig deep into the engineering design process, applying math, science and engineering standards to hands-on projects. They work both individually and in teams to design solutions to a variety of problems using 3D modeling software.

Fee: This course requires a student fee.

PRINCIPLES OF ENGINEERING

Grade Level:	10, 11, 12
Course Credit:	1 credit, two semesters
Prerequisite:	Introduction to Engineering Design OR Teacher recommendation

Description:

This is the second course in the Project Lead the Way (PLTW) Engineering Pathway. Through problems that engage and challenge, students explore a broad range of engineering topics, including mechanisms, the strength of structures and materials, robotics, coding, and automation. Students will employ engineering and scientific concepts as they develop skills in problem solving, research, and design and manufacturing while learning strategies for design process documentation, collaboration and presentation.

Fee: This course requires a student fee.

ENGINEERING APPLICATIONS

Grade Level:	10, 11, 12
Course Credit:	1 credit, two semesters
Prerequisite:	Teacher recommendation, Intro to Engineering Design AND either <ul style="list-style-type: none">● Principles of Engineering; or● AP Computer Science Principles or AP Computer Science A; or

- AP Physics

Description:

This course will require students to work in teams on various (student and teacher) directed engineering projects. Students will apply and further develop the skills they have learned in prerequisite engineering classes as well as learn new skills to further their understanding of the Engineering Design Process. Students will use various resources and skills such as Vex Robotics, Arduino boards, Autodesk Inventor (or comparable 3D modeling software), various programming languages, documentations, communication and presentation skills, 3D printing and CNC machining to resolve real world problems.

Fee: This course requires a student fee

CP MODERN WORLD HISTORY

Grade Level: 9

Course Credit: 1 credit, two semesters

Description:

This course examines world events from 1600 to the present. It explores the impact of the democratic and industrial revolutions, the forces that led to world domination by European powers, the wars that changed empires, the ideas that led to independence movements, and the effects of global interdependence. Students will build upon previously learned historical thinking skills by locating and analyzing primary and secondary sources from multiple perspectives then drawing conclusions.

HONORS MODERN WORLD HISTORY*

Grade Level: 9
Course Credit: 1 credit, two semesters

Description:

In addition to the historical content covered in CP Modern World History, this course will include an introduction to the same thinking skills and methods (analyzing primary and secondary sources, making historical comparisons, chronological reasoning, and argumentation) employed by historians when they study the past. Significant differences from the CP Modern World History course include an introduction to AP level essay writing and critical analysis of primary and secondary documents. This course may require the purchase of supplemental reading materials.

AP HUMAN GEOGRAPHY**

Grade Level: 9, 10, 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Teacher recommendation
Co-Requisite: Honors English 9 (for Grade 9 only)

Description:

This is a college level geography course designed to prepare students for success on the AP exam. Students should enter this course with exceptional essay writing skills. Students should also have experience with analyzing primary and secondary sources, making historical comparisons, chronological reasoning, and argumentation. The purpose of AP Human Geography is to introduce students to the systematic study of patterns and processes that have shaped human understanding, use, and alteration of the Earth's surface. Students employ spatial concepts and landscape analysis to examine human social organization and its environmental consequences.

Fee: This course requires a fee for the AP Exam.

U.S. HISTORY

Grade Level: 10
Course Credit: 1 credit, two semesters

Description:

This course examines the history of the United States of America from the founding period to the present. The federal republic has withstood challenges to its national security and expanded the rights and roles of its citizens. The episodes of its past have shaped the nature of the country today and prepared it to attend to the challenges of tomorrow. Understanding how these events came to pass and their meaning for today's citizens is the foundation of this course. Students will build upon previously learned historical thinking skills by locating and analyzing primary and secondary sources from multiple perspectives then drawing conclusions. This course is designed to help students reach proficiency (a 3 or higher) on the state of Ohio's end-of-course exam.

Fee: This course requires a student fee.

AP U.S. HISTORY**

Grade Level:	10, 11, 12
Course Credit:	1 credit, two semesters
Prerequisite:	Teacher recommendation
Co-Requsite:	Honors English 10

Description:

This course is designed to provide high performing students with a college level U.S. History course. It focuses on the development of students' abilities to think conceptually about U.S. history from approximately 1491 to the present, as well as the development of historical thinking skills such as analyzing primary and secondary sources, making historical comparisons, utilizing reasoning about contextualization, causation and continuity and change over time, and developing historical arguments. Students will learn to assess primary historical sources and weigh evidence and interpretations presented in historical scholarship. They will develop the argumentation skills necessary to present analysis and evidence clearly and persuasively and will be required to write several long essays and document-based essays. Students will be required to read a significant amount of reading from a college-level textbook as well as selected works beyond the text. This course will prepare students to take the Advanced Placement Exam. Summer reading is required.

Fee: This course requires a student fee + AP Exam fee.

AP EUROPEAN HISTORY**

Grade Level:	11, 12
Course Credit:	1 credit, two semesters
Prerequisite:	Teacher recommendation

Description:

The AP European History course focuses on developing students' understanding of European history from approximately 1350 to the present. The course has students investigate the content of European history for significant events, individuals, developments, and processes in four historical periods, and develop and use the same thinking skills and methods (analyzing primary and secondary sources, making historical comparisons, chronological reasoning and argumentation) employed by historians when they studied the past. Students will be required to read a college textbook and related materials beyond the high school text. The course is based on the College Board requirements that will prepare the student to pass the Advanced Placement Exam. Summer reading may be required.

Fee: This course requires a student fee + AP Exam fee.

AMERICAN GOVERNMENT

Grade Level: 11, 12

Course Credit: 0.5 credit, one semester

Description:

This course includes a study of the organization and operation of the national, state and local governments. Topics to be studied are the three branches of federal government, state and local governments and current issues under the United States Constitution. This course is designed to help students reach proficiency (a 3 or higher) on the state of Ohio's end-of-course exam.

Fee: This course requires a student fee.

AP U.S. GOVERNMENT AND POLITICS**

Grade Level: 11, 12

Course Credit: 0.5 credit, one semester

Prerequisite: Teacher recommendation

Description:

This semester course is designed for students who have shown an interest in the study of government at the college level. It will include the study of general concepts used to interpret United States politics and the analysis of specific case studies. It also requires familiarity with the various institutions, groups, beliefs and ideas that constitute U.S. political reality. Major topics of study will include: the constitutional underpinnings of our government, political beliefs and behaviors, political parties and interest groups, the institutions and policy processes of our national government, civil rights and civil liberties. This course will prepare students for the Advanced Placement Exam.

Fee: This course requires a student fee + AP Exam fee.

SOCIAL PSYCHOLOGY

Grade Level: 10, 11, 12

Course Credit: 0.5 credit, one semester

Description:

This is a survey course designed to provide the student with a strong fundamental background in psychology that will be useful in everyday applications as well as in a college introductory psychology course. Major topics of study will include: behavioral history, memory, intelligence, personality development, motivation, normal and abnormal behavior, states of consciousness and mental disorders. Students will be assigned papers, projects, and experiments throughout the semester.

AP PSYCHOLOGY**

Grade Level: 10, 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: Teacher recommendation

Description:

The AP Psychology course is designed to introduce students to the systematic and scientific study of the behavior and mental processes of human beings and other animals. Students are exposed to the psychological facts, principles, and phenomena associated with each of the major subfields within psychology. Students will also learn about the ethics and methods psychologists use in their science and practice. Students will demonstrate literacy while practicing the Free Response format.

Fee: This course requires a fee for the AP Exam.

AP MACROECONOMICS**

Grade Level: 10, 11, 12

Course Credit: 0.5 credit, one semester

Prerequisite: Teacher recommendation

Description:

The purpose of this course in macroeconomics is to provide students with an understanding of the principles of economics that apply to an economic system as a whole. This AP macro course emphasizes the study of national income and price-level

determination and will also develop student familiarity with economic performance measures, financial sector stabilization policies, economic growth and international economics.

This course fulfills the financial literacy graduation requirement for the Classes of 2023, 2024, and 2025. It does *not* fulfill the financial literacy requirement for the Class of 2026 and beyond.

Fee: This course requires a fee for the AP Exam.

SOCIOLOGY

Grade Level: 10, 11, 12

Course Credit: 0.5 credit, one semester

Description:

This semester course will engage students in a brief overview of the field of sociology. It will include a description of the origins of the subject itself and will challenge students to view life through the sociological perspective. This perspective encourages students to see how people, including themselves, are shaped by societal forces. The course focuses on introductory concepts, research and theories involved in increasing the understanding of human behavior and human societies. The interrelations among human societies, individuals, organizations, and groups are analyzed while numerous contemporary social problems and issues will be discussed.

WORLD CULTURES

Grade Level: 10, 11, 12

Course Credit: 0.5 credit, one semester

Description:

This course will examine the cultures of the world from the ancient world to the modern day. Specific geographical targets include North and South America, Europe, Africa, the Middle East and Asia. Students will use 21st Century skills to draw comparisons and connections from ancient civilizations to the modern era. Students will explore the influences of religion, economics, conflict and political structures.

MODERN AMERICA

Grade Level: 10, 11, 12

Course Credit: 0.5 credit, one semester

Description:

This course will examine the major themes of 21st Century U.S. history including a combination of historical events and ongoing social issues. Students will examine economic, social and geopolitical topics including but not limited to: America's role as a world power, 9/11 and the War on Terror, immigration, the impact of technology on the economy and society, race and culture, and the origins of modern American politics.

WORLD WAR II**Grade Level:** 10, 11, 12**Course Credit:** 0.5 credit, one semester**Description:**

The two world wars that were fought in the twentieth century shaped and defined today's world. This course is an in-depth look at the second of those wars, World War II, from its origins to its conclusion and legacy. The purpose of this course is to provide students with a broad view and comprehensive understanding of World War II as a global event. It will deal with the war's causes, conduct, and ultimate consequences. These include the reshaping of the European map, the genocide of European Jews, and the world entering into the nuclear age. It will cover the war from the perspective of all the major belligerents, Axis and Allied. The dominant perspective, however, will be that of the United States; the only Allied power to play an important role in the defeat of all three Axis powers - Germany, Italy and Japan.

Fee: This course requires a student fee

Teaching Professions

TEACHING PROFESSIONS

Code	Course	Level	Grade	Semesters	Credit	Career Pathways
6801	Fundamentals of Education		9-12	1	0.5	 
6802	Schools and Community		9-12	1	0.5

6840	Teaching Professionals Academy 4: Internship - Capstone/Practicum*	H	12	2	1.0	 

**Denotes Honors-level GPA boost

Teaching and Learning Fundamentals in Education is delivered through two semester-long courses which may be offered to students in grades 9-12 (with priority given to 9th and 10th graders). Fundamentals A and Fundamentals B will both be 0.5 credit and one semester in length. While students entering 9th grade are encouraged to begin either A or B, they may take both semesters in the same year or in different school years. Fundamentals A and B do not have to be taken in any particular order.

FUNDAMENTALS OF EDUCATION

Grade Level: 9-12

Course Credit: 0.5 credit, one semester

Description:

In this introductory class for the Teaching Professions Academy Program, students will examine the traits of successful teachers and school leaders, and determine how those traits impact the growth and development of learners. Focus will be placed on developing effective communication skills and collaboration will be a key component of the course. Students will develop an understanding of professionalism in education, the multicultural history of American Education, finance and governing of schools, and develop a philosophy of education.

SCHOOLS AND COMMUNITY

Grade Level: 9-12
Course Credit: 0.5 credit, one semester

Description:

In this second introductory class for the Teaching Professions Academy Program, students will examine the relationship of families, communities, and schools in the growth and development of learners. They will implement strategies to actively involve families and communities in child development and learning, determine community resources and services available to families and schools, and act as advocates for students and learning. Throughout the course, working with socially, culturally, and linguistically diverse families will be emphasized.

TEACHING PROFESSIONS ACADEMY 1: CURRICULUM AND INSTRUCTION

Grade Level: 11-12
Course Credit: 1 credit, two semesters
Prerequisite: None

Description:

This course, and Teaching Professions Academy Pathway, is designed for the student who enjoys working with children through the teaching and learning process. The sequential courses in this program support the student's post-secondary Teaching Professions Academy career major. Students will develop age-appropriate learning experiences and curriculum to engage children and help them learn. They will determine curricular goals, create lesson plans, and employ grading and assessment strategies to measure targeted learning outcomes. In addition, students will develop online instruction using learning management system platforms. Students will be enrolled in the school's chapter of Educators Rising. Field trips to various colleges will be incorporated into classroom activities.

TEACHING PROFESSIONS ACADEMY 2: CLASSROOM MANAGEMENT (ONLINE)

Grade Level: 11-12
Course Credit: 1 credit, two semesters
Prerequisite: Teaching Professions Academy 1: Curriculum and Instruction

Description:

In this innovative online course that is crosswalked with Teaching and Learning Curriculum and Instruction, students will apply developmentally appropriate techniques to advance learners' social and emotional growth. They will create classroom environments to maximize the learning potential of each learner. Additionally, students will create and enforce classroom rules, establish classroom routines, and model self-discipline for learners. Conflict resolution, positive discipline and behavioral modification techniques will be emphasized throughout the course.

TEACHING PROFESSIONS ACADEMY 3: EDUCATION PRINCIPLES*

Grade Level: 12
Course Credit: 1 credit, two semesters
Prerequisite: Teaching Professions Academy 1:Curriculum and Instruction,
And Teaching Professions Academy 2: Classroom Management

Description:

This is one of two second level courses in the Teaching Professions Academy Program. Students will research the historical perspectives and theories of education used in the forming of their own personal educational philosophy. Students will assess legal, ethical, and organizational issues. Additionally, students will assess developmentally appropriate practices and identify challenging issues associated with teaching children with diverse needs. In this course, students will receive instruction and support as they develop the capstone portfolio project. Career planning, professional guidelines, and ethical practices will also be emphasized. Students will be enrolled in the school's chapter of Educators Rising.

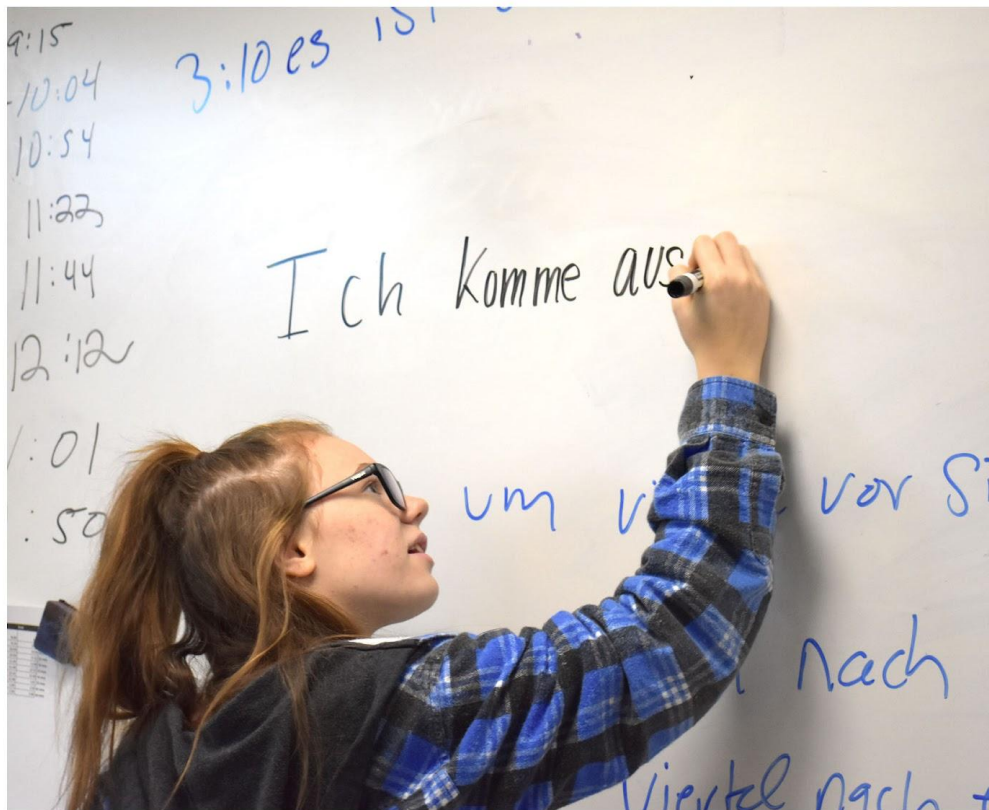

TEACHING PROFESSIONS ACADEMY 4: CAPSTONE INTERNSHIP*

Grade Level: 12
Course Credit: 1 credit, two semesters
Prerequisite: Teaching Professions Academy 1:Curriculum and Instruction,
And Teaching Professions Academy 2: Classroom Management
Co-Requisite: Teaching and Learning Education Principles

Description:

This is one of two second level courses in the Teaching Professions Academy Program. Students apply Teaching Professions Academy program knowledge and skills in a comprehensive and authentic way. Under the supervision of the school and through partnerships with schools in the Forest Hills School District, learners will complete internships in the primary, intermediate, middle and high school levels. Students will

develop 21st Century skills directly related to success in college and professional settings. Visits to colleges with educational programs will be incorporated into the program.

**Denotes AP-level GPA boost

A NOTE TO STUDENTS: At all levels of study, the teacher uses the target language extensively and encourages the students to do so. In addition, the teacher provides opportunities to communicate in the target language in meaningful and purposeful activities that simulate real-life situations. Activities that develop skills enable students to participate successfully. Time devoted to listening, speaking, reading and writing is appropriate to course objectives and to the language skills of students. Culture is systematically incorporated into instruction which enables students to develop positive attitudes toward cultural diversity.

The teacher uses explicit error correction in activities that focus on accuracy and implicit or no error correction in activities which focus on communication. The teacher also establishes an effective climate in which the students feel comfortable taking risks.

Prerequisites:

To be successful in a world language, a student must be willing to study daily, complete daily homework assignments and memorize vocabulary. World Languages are taught sequentially. Each course offers one credit. Upon completion of a level, students are eligible to enroll in the next level.

LEVEL I

Grade Level: 9, 10, 11, 12

Course Credit: 1 credit, two semesters

Description:

In Level I, students are introduced to culture, basic vocabulary, grammar and pronunciation which are keys to building a foundation in reading and speaking. The curriculum includes basic communicative skills in listening, speaking, reading and writing. Courses which are recommended for 9th grade students or older that read and perform language arts skills on or above grade level. Upon completion of the level, students are eligible to enroll in the next course if they perform at or above expected proficiency level and should have a strong interest in continuing the study of the language.

Fee: These courses require a student fee.

LEVEL II

Grade Level: 9, 10, 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: Level I or equivalent proficiency test shown, achievement at or

above expected proficiency

Description:

In Level II, students will continue to develop the skills learned in the first year. The emphasis is on developing a broader range of vocabulary and more complex sentence structure. Students who have successfully completed Level I or who have demonstrated proficiency as determined through a language proficiency test or through teacher recommendation and have a strong desire to continue the language are eligible to take this course.

Fee: These courses require a student fee.

LEVEL III*

Grade Level: 10, 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: Level II or above expected proficiency level on assessment

Description:

Level III is recommended for students who are motivated to move toward an intermediate level of proficiency. This year involves extensive use of the language to further develop skills in writing, reading, listening and speaking. Students will be expected to use the language and practice communicating in spoken and written forms. Students who have successfully completed Level II or who have demonstrated proficiency as determined from a language proficiency test or teacher recommendation are eligible to take this course. This course is recommended for college-bound students who plan to take university placement tests in a world language. Successful completion of this course is one of the requirements for an Ohio Honors Diploma.

Fee: These courses require a student fee.

ADVANCED LANGUAGES*

Advanced languages are for students who are motivated to continue the study of languages. These honors courses are designed to help prepare students for university placement tests. Many university world language departments offer placement test options for all students which may allow them to test out of lower level language requirements and for which they may receive university credit. Recommendation from World Language teacher is encouraged as well as a strong interest in continuing the study of the language.

MANDARIN

Grade Level: 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Level III

Description:

Advanced Mandarin Conversation and Structure* is designed to enable students to participate extensively in the life of the Chinese society. Students will be able to discuss, compare and contrast, support, or persuade an opinion in various topics. Grammar and writing skills will be refined in the context of cultural studies. Students will demonstrate understanding about the details of authentic texts.

Fee: This course requires a student fee.

Grade Level: 12
Course Credit: 1 credit, two semesters
Prerequisite: Conversation and Structure

Description:

AP Chinese Language and Culture** emphasizes communication by applying the interpersonal, interpretive and presentation modes of communication in real-life situations. This includes vocabulary usage, language control, communication strategies and cultural awareness. The AP Chinese Language and Culture Course strives not to overemphasize grammatical accuracy at the expense of communication. To best facilitate the study of language and culture, the course is taught almost exclusively in Chinese.

Fee: This course requires a student fee + AP Exam fee.

GERMAN

Grade Level: 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Level III

Description:

Advanced German Conversation and Structure* provides students with opportunities to study current and historical topics and culture in German-speaking countries. Students will continue to learn vocabulary and structures vital to communication. They will improve their ability to understand and apply the German language in written and spoken form through consistent use of the language in class. Topics covered will include family relations, media, art, science and business.

Fee: This course requires a student fee.

Grade Level: 12
Course Credit: 1 credit, two semesters
Prerequisite: Conversation and Structure

Description:

AP German Language and Culture** emphasizes communication by applying the interpersonal, interpretive, and presentation modes of communication in real-life situations. This includes vocabulary usage, language control, communication strategies and cultural awareness. The AP German Language and Culture Course strives not to overemphasize grammatical accuracy at the expense of communication. To best facilitate the study of language and culture, the course is taught almost exclusively in German.

Fee: This course requires a student fee + AP Exam fee.

LATIN

Advanced Latin Selections throughout Roman History*

Grade Level: 11, 12
Course Credit: 1 credit, two semesters
Prerequisite: Level III

Description:

This course will allow students the opportunity to learn vocabulary and refine reading and writing skills in the context of Roman cultural studies. Students will also develop their skills through exposure to authentic literature, including excerpts from Caesar, Vergil, Horace, Catullus, Ovid and others.

Fee: This course requires a student fee.

AP Latin**

Grade Level: 12
Course Credit: 1 credit, two semesters
Prerequisite: Advanced Latin Selections throughout Roman History

Description:

This course focuses on the in-depth study of selections from two of the greatest works in Latin literature: Vergil's *Aeneid* and Caesar's *Gallic War*. The course requires students to prepare and translate the readings and place these texts in a meaningful context, which helps develop critical, historical, and literary sensitivities. Throughout the course, students consider themes in the context of ancient literature and bring these

works to life through classroom discussions, debates and presentations. Additional English reading from both of these works help place the Latin readings in significant context.

Fee: This course requires a student fee + AP Exam fee.

SPANISH

Advanced Spanish Conversation and Structure*

Grade Level: 11, 12

Course Credit: 1 credit, two semesters

Prerequisite: Level III

This course provides students with an opportunity to speak, read, and write in Spanish as the class focuses on authentic Spanish materials. Students will systematically review grammar structures and expand vocabulary to increase effectiveness in communication.

Fee: This course requires a student fee.

AP Spanish Language and Culture**

Grade Level: 12

Course Credit: 1 credit, two semesters

Prerequisite: Advanced Spanish Conversation and Structure

Description:

AP Spanish Language and Culture** emphasizes communication by applying the interpersonal, interpretive, and presentation modes of communication in real-life situations. This includes vocabulary usage, language control, communication strategies and cultural awareness. The AP Spanish Language and Culture Course strives not to overemphasize grammatical accuracy at the expense of communication. To best facilitate the study of language and culture, the course is taught almost exclusively in Spanish.

Fee: This course requires a student fee + AP Exam fee.
